

FOSSE
Liquitrol

SPILL & POLLUTION SOLUTIONS

Helping companies to overcome their spill and pollution control challenges is our business.

Fosse Liquitrol provides the widest range of spill and pollution control products and services specifically developed to assist companies prevent and cope with liquid spills and pollution.

Established in 1984, Fosse Liquitrol has become the industry's 'first choice' for spill and pollution control products. Our products deliver a blend of quality, performance, reliability and value for money. Our knowledge and expertise has assisted countless companies both in the UK and abroad to find practical, sensible and cost effective solutions to their spill and pollution control requirements, helping them to meet their legal and moral obligations while contributing towards a cleaner, greener, environment. Our work with government and non-government organisations puts us at the forefront of spill and pollution control, both in the UK and overseas.

Our Commitment to Spill and Pollution Control in Industry.

Commitment to the requirements of industry and the ability to innovate in products, services and technology is the key to the rapid development of Fosse Liquitrol. Fosse is a dynamic, privately owned company with a string of awards for innovation in products and services.

Why Choose Us:

- Our standards conform to BS 7959
- All spill response products are manufactured to BS EN ISO 9001:2015 quality standards
- We provide immediate supply of the highest performance and most cost-effective spill and pollution response products in the marketplace
- Accredited in November 2004 by the British Safety Industry Federation to deliver on-site 1st Responder and Spill Awareness Training Courses.

Fosse Liquitrol is committed to supplying the spill and pollution control market through our extensive distributor network. Our technical specialists work in close partnership with our network of approved distributors. Fosse Liquitrol has extended its distributor network into Europe, the Gulf States, Singapore, Nigeria and South America.

Training and Education

Specific training for workers, accredited by the British Safety Industry Federation, is a key component of effective spill and pollution control. Both 1st Responder Spill Awareness and Response, and Train The Trainer Courses are run throughout the territories in which Fosse Liquitrol operates.

Marine Oil Spill Response

Regulated by the International Marine Organisation (IMO) OPRC90 convention and accredited by The Nautical Institute on behalf of the MCA, the courses are provided from Technician to Executive Commander Levels.

Courses are all delivered by Gorton Consultancy Ltd who are our contracted provider and hold the Nautical Institute's Accreditation.

- As chairman of the Spill Control Group: British Safety Industry Federation, Fosse Liquitrol is integrally involved in promoting industry best practice recommendations for oil and chemical spill response and spill containment and played an active role in the creation of the BS 7959 absorbent test standards.

spilkleen

Simple and Effective range of absorbents

An effective absorbent that combines durability, versatility and performance. Ideal for use on all workplace spills and leaks. Manufactured from high quality meltblown polypropylene, it is tough and highly absorbent.

spilchoice

Performance and Endurance range of absorbents

The addition of a tough spunbond cover sheet enhances strength and resilience, whilst reducing linting.

A higher loft yields increased absorbency and improved liquid retention. Spilchoice absorbents are ideal for use in tougher environments where superior performance is required.

Spill-Mate

Absorbent dispensing systems for use with absorbent pads, rolls and socks, available in wall, bench and stand mounted formats. Provides a compact and convenient way of dispensing absorbents.

Range of fast acting super absorbent powder and lay flat absorbent strips

Leading manufacturer of spill containment, stormwater management, facility protection and construction compliance products. Ultratech leads the way with innovation, creativity, initiative and new product development.

VYTAC

A DIVISION OF CARTIER CHEMICALS

Leading brand of chemical neutralisers designed for safe operator use, with built in pH indicators.

A globally recognised range of high quality spill containment products incorporating a host of innovative features.

FASTANK

Provide a flexible solution to the permanent or temporary containment of liquids.

User friendly method of spill containment designed to replace traditional drip trays. Able to withstand all weather conditions and rugged enough to stand machinery plant on all year round to contain any oil spills.

UK manufacturer of super absorbent products designed to protect homes and businesses from leaking water

Wipes with a difference. Innovative wiping materials, colour-coded boxes, unique wiping substrates, wiping solutions, as well as environmentally friendly choices.

Prevention & Containment

- Spill Trays
- Work Floors
- Spill Pallets
- Overpacks
- IBC Spill Pallets
- Flexible Bunds
- Drum Handling
- Cabinets
- Bunded Stores
- Tanks

Prevention & Containment

In the UK containers of oil or fuel cannot be stored outside unless they are correctly banded in a secondary containment item (Oil Storage Regulations 2001). This means that if the container of oil leaks it will be contained within the bund. The secondary containment item must be able to hold a minimum of 25% of the total volume or 110% of the largest container whichever is the greater. If a company stores 4 x 205 litre drums the pallet sump must be able to hold 225.5 litres of liquid.

Spill trays - suitable for containing minor spills within the work place and for the safe storage of small containers of liquids.

Work floors - modular internal system designed for use as a liquid dispensing or decanting station within the working environment to contain any incidental spills.

Drum spill pallets - secondary containment systems designed to collect drips, spills or leaks from oil and chemical drums. These prevent the spread of any spilt liquids across the workplace floor and ensure safe working. Fully compliant with current UK Storage Regulations.

Overpacks - designed for the safe storage, containment and transportation of damaged or leaking chemical and fuel drums. Manufactured in accordance with UN packing regulations.

IBC spill pallets - secondary containment system designed to collect liquid drips, spills and leaks from Intermediate Bulk Containers. Fully compliant with current UK Storage Regulations.

Flexible bunds - provides a flexible and mobile means for fuel, chemical and water spill containment. They are widely used as temporary bunds for mobile plant and machinery.

Drum handling - drum handling and dispensing products designed to make the action and dispensation of liquids from drums around site as efficient and as safe as possible.

Cabinets - provide safe storage and segregation of chemicals, paints, flammable and hazardous substances as defined by COSHH guidelines.

Bunded stores - provide safe storage for 205 litre drums, 1000 litre IBCs and other smaller containers. A bunded store can help avoid potential spill hazards and environmental pollution by containing the total volume of liquid stored should a spill occur. Fully compliant with current UK Storage Regulations.

Tanks - manufactured in both polyethylene and steel. These provide for the safe storage and dispensing of waste oil, heating oil, diesel, lubricants and coolants.

Spill Trays

■ FL-205-519

■ FL-10-101
Complete with one x oil only pad

■ FL-205-513

■ EN-5248-YE

MADE IN THE USA

APPLICATION

- Lightweight, durable secondary containment spill trays designed to contain any liquid spills during refilling or transportation

FEATURES & BENEFITS

- Manufactured from UV and chemical resistant non-corroding polyethylene
- Ensures all liquid spills are retained within the bund
- Makes decanting of liquids safer, cleaner, and more manageable
- Prevents the risk of accidents to your employees by eliminating drips and spills spreading over the working floor space

Work Floors

APPLICATION

- Low-profile spill pallet allows you to customise a liquid dispensing area in the workplace

FEATURES & BENEFITS

- Tough, one-piece polyethylene construction that will not rust or corrode
- Low profile drip and leak protection
- Large sump capacity catches incidental spills
- Removable heavy-duty structural foam grates for easy cleaning
- Rolled-edge design helps resist cracking and warpage
- Multi-purpose ramp hooks onto the units for easy loading
- Link-Locks create a solid workspace by firmly attaching the units together

Spill Pallets Spill Pallet Ramps

APPLICATION

- Bunded secondary containment for the storage of 205 litre drums

FEATURES & BENEFITS

- Constructed from chemical resistant UV-stabilised PE
- Compatible with most forklifts, pallet and stacker trucks
- Removable platform grid for easy cleaning
- Platform with hand inserts and holes for inspection and pump insertion
- Resistant to a wide range of chemicals, will not corrode
- Stackable 4 drum model available for ease of storing and shipping
- Fully compliant with current UK Oil Storage Regulations
- Capacity meets/exceeds UK, European and US regulations

Spill Pallet Ramps

- Ramp and block module for spill pallets
- Manufactured from tough, durable chemical resistant polyethylene
- Resistant to both high and low temperatures
- Integrated locking system for added safety
- Ergonomic slope of 11 degrees
- Easy to clean

Steel Spill Pallets

APPLICATION

- Designed for commercial and industrial environments to store 205 litre drums of liquids

FEATURES & BENEFITS

- Manufactured from high quality sheet steel
- High impact strength
- Leakproof sump
- Removable galvanised spill grid for easy cleaning
- Suitable for both pallet truck and forklift truck conveyance

Code	Description	Dimensions L x W x H mm	Containment Capacity Litres
STEEL SPILL PALLETS			
FL-205-726	1 Drum	800 x 800 x 500	210

FL-205-728	4 Drum	1400 x 1400 x 275	290

Hardcover Drum Storage Covered Spill Pallets

APPLICATION

- Provides safe secure storage for a single 205 litre drum

FEATURES & BENEFITS

- Manufactured from tough and durable polyethylene
- Roll top, lockable cover for easy access (Please note padlock not included)
- Head space allows the use of drum pumps and funnels
- Upper body is easily removed to aid loading and unloading of drums
- Forkliftable or easily moved around site on the optional steel dolly
- Complies with SPCC and EPA Container Storage Regulations 40CFR264.175 and the current UK Oil Storage Regulations
- 5 year warranty against any manufacturing defects

Code	Description	Dimensions Dia x H mm	Containment Capacity Litres	Weight kgs

UL-143-410	Drum Hardtop Unit	915 x 1677	265	34
UL-143-424	Steel Dolly	674 x 127		16

APPLICATION

- Secondary containment system designed for the storage of 205 litre drums

MADE IN THE UK

FEATURES & BENEFITS

- Prevents rainwater contaminating the bund and avoids the need to pump out
- Manufactured from tough and durable polyethylene resistant to all weather conditions
- UV stabilised and chemical resistant
- Designed to capture and contain any drips, leaks or spills of fluids
- Removable platform grid for ease of cleaning
- Compatible with most forklift, pallet and stacker trucks
- Fully complies with current UK Oil Storage Regulations

Code	Description	Dimensions L x W x H mm	Containment Capacity Litres	Weight kgs
COVERED SPILL PALLETS				
FL-205-110	4 Drum Pallet Frame & Cover	1415 x 1310 x 1870	410	54
FL-205-207	8 Drum Pallet Frame & Cover	2560 x 1350 x 2140	1140	181

Hardcover Drum Storage

APPLICATION

- Suitable for the secure storage of 205 litre drums, chemicals, drum dispensing and hazardous waste

FEATURES & BENEFITS

- Rigid, double walled chemical resistant and weathertight PE construction
- Extremely robust and durable
- Tall head space easily accomodates rotary pump equipment and conical funnels
- Access to both sides (only one at a time) via 2 x sliding shutter doors
- Unit can be padlocked (Please note padlock not included)
- Forkliftable from both sides whilst empty
- Delivered fully assembled and ready for use
- Manufactured in accordance with current UK Oil Storage Regulations

Overpacks

APPLICATION

- Storage and containment of damaged or leaking chemical and fuel drums

FEATURES & BENEFITS

- Excellent resistance against chemicals, acids, caustics and corrosives
- Constructed from heavy duty polyethylene
- Screw-on-lids with air/water tight gasket
- Ribbed design provides additional strength
- Nestable design and low tare weight allow convenient storage
- All comply with UN Packaging Group 1 (X-Rating) and are certified for use as DOT Salvage Drums, 49 CFR 173.3 (c)
- 5 year guarantee against manufacturing defects

ENVIROSALV PLUS

FEATURES AND BENEFITS

- Four point locking system provides added security by locking stacked salvage drums
- Easy lid twist-down closing with crush resistant seal
- Ribbed design provides additional strength
- Engineered shoulder design allows workers and material handling equipment to move drums with ease
- Optional lock down kit provides a lockable, serialised identification security system
- Certified to UN 1H2/X295/S, DOT 49 CFR 173.3 (c), EPA, SPCC and NPDES

Steel IBC Spill Pallets

NEW

APPLICATION

- Designed for commercial and industrial environments to store a 1000 litre IBC

FEATURES & BENEFITS

- Manufactured from high quality sheet steel
- Galvanised spill grid
- Suitable for forklift truck conveyance
- Compliant with the current UK Oil Storage Regulations

■ FL-205-729

Code	Description	Dimensions L x W x H mm	Containment Capacity Litres
STEEL IBC SPILL PALLETS			
FL-205-729	Single IBC	1660 x 1350 x 605	1400
FL-205-730	Double IBC	1660 x 2710 x 410	1300

■ FL-205-730

IBC Spill Pallet Tarpaulin IBC Pallet Frame & Cover

APPLICATION

- Enables an IBC pallet to be stored outside without the risk of the sump becoming contaminated with rainwater

FEATURES & BENEFITS

- Fold-up work area maintains access to the valve for dispensing
- Weather resistant document pouch
- Chemical resistant fabric for long life, even in full UV exposure
- Bungee straps along the bottom keep the tarpaulin in place

Code	Description	Dimensions L x W x H mm	Weight kgs
ENPAC TARPULIN			
GN-5469-TARP	Single IBC Tarpaulin	2040 x 1830 x 1870	6.6

MADE IN THE USA

■ GN-5469-TARP

■ FL-205-206

■ FL-205-207

APPLICATION

- Protects the bund and IBC from the elements making it ideal for outdoor storage

FEATURES & BENEFITS

- Supplied complete with frame, roof and roll-up door
- Manufactured from tough and durable polyethylene resistant to all weather conditions
- Base fork pockets provide easy loading onto a forklift truck when empty
- UV stabilised and chemical resistant
- Prevents rainwater contaminating the bund
- Compliant with current UK Oil Storage Regulations

MADE IN THE UK

Code	Description	Dimensions L x W x H mm	Containment Capacity Litres	Weight kgs

Hardcover IBC Spill Pallets

APPLICATION

- Weather-tight units designed for the external storage of a standard 1000 litre IBC

FEATURES & BENEFITS

- Manufactured from tough and durable polyethylene
- Resistant to a wide range of chemicals and severe weather conditions
- Upper roll top door and lower swing-out doors combine to allow easy and convenient access
- Unique, lockable, dual closure allows quick access to IBC tanks or drums (Please note padlock not included)
- Base unit includes fork pockets to allow easy loading with a forklift truck
- Compliant with current UK Oil Storage Regulations

Plant Nappy PlantMat

APPLICATION

- Designed to be placed under site equipment and machinery allowing any spills of fuel and oil to be contained within the base whilst allowing clean water to escape

FEATURES & BENEFITS

- Robust construction able to withstand all weather conditions
- The mat can be placed on uneven ground or slight inclines with no loss of performance
- The base features a cushioned, non-slip surface which prevents machinery moving
- Lightweight and fully portable for ease of transportation around site
- Four securing tabs can be used in conjunction with pegs to secure the mats in adverse weather conditions
- Any oil or fuel is contained within the base allowing clean, uncontaminated water to pass through the side walls into the surrounding ground
- We would always recommend the use of a liner to prolong the life of the nappy**
- Shoulder bag kit includes
 - 1 x medium plant nappy,
 - 2 x liners, 2 x pairs of disposable gloves
 - 2 x disposable bags and ties, supplied in a heavy duty PVC carry case

Code	Description	Dimensions L x W x H mm	Containment Capacity Litres	Weight kgs

FL-94-401	Shoulder Bag Kit	1000 x 685 x 70	9	5

PlantMat

APPLICATION

- Designed to be placed under site equipment and machinery to absorb and contain any oil and fuel leakage

FEATURES & BENEFITS

- Can be used independently or with an existing PlantNappy to offer the ultimate protection
- Allows only clean water to escape into the ground with as little as 2.6ppm total hydrocarbons when used with a PlantNappy
- Turns oil and fuels into a solid mass within a textile, no leaching
- Tough construction, puncture and tear resistant

Code	Description	Dimensions L x W mm	Containment Capacity Litres	Weight kgs

Bund Strips

APPLICATION

- Creates a semi-permanent barrier to confine any liquid spills or create a bunded area

FEATURES & BENEFITS

- Yellow PVC outer cover resists oil, coolants, water and most chemicals
- Crush resistant foam ensures the bund retains its shape even when run over by a vehicle
- Strips can be easily cut to length for greater flexibility
- High visibility yellow colour provides a visual presence for increased safety
- Easily secured to the floor surface with contact adhesive
- Economical containment for leaks and spills around machinery and equipment

NEW

Pop Up Pools

Mini Foam Wall Bunds

APPLICATION

- Ideal for containing liquid spills from damaged drums, machinery, pipe work and as a decontamination pool

FEATURES & BENEFITS

- No set-up required, simply shake and they instantly expand for quick deployment
- Foam ring around the top perimeter rises with the level of liquid
- Extremely compact, folded units require minimal storage space
- Reusable after decontamination
- Excellent chemical, diesel fuel, anti-freeze, acids, caustics and corrosives resistance

Code	Dimensions Dia x H mm	Containment Capacity Litres	Weight kgs

Mini Foam Wall Bunds

APPLICATION

- Spill containment for vehicles, equipment and containers

FEATURES & BENEFITS

- Manufactured from heavy duty PVC
- Excellent chemical compatibility
- Foam side walls provide support but can be driven over
- Compact and easy to deploy in the event of a spill
- Bunds fold down after use for transport or storage

Code	Dimensions L x W x H mm	Containment Capacity Litres	Weight kgs
ULTRATECH MINI FOAM WALL BUNDS

UL-143-430	1200 x 1800 x 152	284	4

Containment Bunds

APPLICATION

- Provides flexible and mobile spill containment. Widely used as a bund for mobile plant and generators, as a method of catching fuel and chemical spills or as a temporary measure for liquid storage

FEATURES & BENEFITS

- Manufactured from chemical, fuel and oil resistant materials
- Drop down walls facilitate easy access
- Simple assembly, no tools required
- Corrosion resistant and easy to clean
- Durable, long lasting
- Easy to transport
- Meets environmental legislation ISO 14001 and Oil Storage Regulations (OSR)

Code	Dimensions L x W x H m	Containment Capacity Litres

FL-25-111	2.5 x 6 x 0.25	3750
FL-25-112	3.5 x 4.5 x 0.25	4000

APPLICATION

- Suitable for wash down applications where contaminated water must be collected, bunding of tanks and drums, construction site equipment and effluent, sewage and waste liquid catchment

FEATURES & BENEFITS

- Manufactured from chemical, fuel and oil resistant materials
- Simple assembly for quick and easy deployment, no tools required
- Easy access drop down walls
- Easily folds away after use
- Reusable, corrosion resistant and easy to clean
- Supplied in a heavy duty carry bag
- Range of optional accessories available
- Bespoke custom sizes available
- Meets environmental legislation ISO 14001 and current UK Oil Storage Regulations (OSR)

ACCESSORIES

GROUND SHEET

- Provides protection to the bund from rough surfaces.
We would always recommend the use of a ground sheet

PROTECTIVE MAT

- Internal matting designed to reduce wear and tear on the bund fabric when supporting heavy loads, or to allow vehicle access

OVERFLOW KIT

- In the event of a leak from a drum, the contents of the bund can be safely discharged into another container from the valve

LINER

- Provides additional protection against aggressive chemicals and aids cleaning after use prolonging the life of the bund

Foam Wall Bunds Collapsible Wall Bunds

APPLICATION

- Suitable for drum and container containment, captures leaks and spills from vehicles, machinery and tanks

FEATURES & BENEFITS

- Low profile design allows easy access
- Soft foam sidewalls easily compress and regain shape for vehicle access
- No set-up required, simply unfold for quick deployment
- Folded units require minimal storage space
- Manufactured from heavy duty PVC material to withstand the rigors of industrial and construction applications
- Bespoke sizes available
- We would recommend a ground sheet/tarpaulin be placed under the bund to provide additional protection against rough/sharp surfaces

Collapsible Wall Bunds

APPLICATION

- Suitable for drum and container containment, captures leaks and spills from vehicles, machinery and tanks

FEATURES & BENEFITS

- Simply swivel the feet of the PVC supports to lower or raise the walls to allow access
- Manufactured from heavy duty PVC
- Bespoke sizes available
- We would recommend a ground sheet/tarpaulin be placed under the bund to provide additional protection against rough/sharp surfaces

Gorilla Containment Bund Hydroblast Pad

Gorilla Containment Bund

FEATURES	BENEFITS
Drive over bund walls	Provides liquid containment combined with vehicle access
Modular construction	Can be constructed to suit individual site requirements
Polymer coated foam blocks	Provides volume storage capacity that can be accessed by vehicles
Blocks dimensions 1829 x 406 x 152mm	Can be repeatedly driven over and regain shape with no damage
Slots in top of blocks to hold rebar	Secures liner in place
Impermeable LLDPE liner	Watertight bunding
2.4 mm Geotextile underliner	Protects liner from puncturing
Liner and underliner resistant to ultraviolet, biological and chemical degradation	Conforms to Environment Agency LFE 5 and CIRIA C736: Design of Containment Systems for the Prevention of Water Pollution from Industrial Accidents
Assembled and disassembled on site	Turnkey job, no need for own technical staff
Can be constructed on concrete, hardcore, tarmac, sand, or grass	Flexible locations
Not secured to the substrate	Easy dismantled and removed after use

Code	Description	Dimensions L x W x Hmm
ULTRATECH GORILLA BUND COMPONENTS		
UL-34-300	Wall section	1829 x 406 x 152mm
UL-34-301	Corner section	610 x 610 x 152mm
UL-34-302	Liner	Liner per sq.m

Hydroblast Pad

APPLICATIONS

- Temporary wash bay
- Area for cleaning equipment while collecting water into a sump

FEATURES	BENEFITS
2 metre high walls on 3 sides	Contains high pressure hydroblasting Easy to install and dismantle
Closed loop system	Independent of water connections
Built in collection box for ATEX submersible pump	Enables water recycling and capture of precious metals
Slip resistant surface and integral hand rails	Safe access ramp onto the platform

Modular Bund Wall Provide Flexible Liquid Containment

COMPONENTS

Corner Section

Straight Section

LLDPE Liner

Welding Joints

Capping Clips

TURNKEY SUPPLY AND INSTALLATION

- Client specifies requirements
- Ground preparation by client in consultation with installation engineers
- Walls and equipment delivered to site
- Installation engineers install walls, geotextile underliner and LLDPE liner

BUND HIRE

- Many applications are for temporary bunding. For example plant refurbishment, construction or demolition projects or temporary lagoons
- Bunds designed to specific requirements can be supplied and installed and removed at end of hire period

AUGEAN NORTH SEA SERVICES

Augean North Sea Services are a waste management company. Hydrocarbon and petrochemical waste from rigs held offshore are brought into harbour and discharged into tanks on the quay. The tanks need secondary containment to comply with Oil Storage Regulations.

The bund needed to be:

- Impermeable liner for hydrocarbons
- Geotextile underlay for protection
- Sized to 40 metres x 13 metres
- Assembled on quayside at short notice
- Tanks manoeuvred into bund during assembly
- Dismantled and removed when job completed
- Reuseable for future jobs

Drum Lids

APPLICATION AND BENEFITS

- Drum lids and funnels provide a simple, cost effective solution to collect liquids, keep the tops of drums dry and help prevent spills
- Manufactured from easy to clean polyethylene they are compatible for use with most liquids

Drum Lid

- Prevents rainwater building up on top of a drum and then causing contamination when the drum is opened

Drum Funnel & Lid

- Suitable for use with most open or closed head 205ltr drums

Drum Funnel

- Manufactured from 100% polyethylene
- No spill decanting

Universal Drum Funnel

- Lightweight durable funnel
- A wide mouth prevents drips, leaks, and splashes

Poly Drum Topper

- Plastic topper easily snaps into place to prevent dirt, debris, and other contaminants from collecting on the tops of drums

Code	Description	Dimensions Dia x H mm	Weight kgs

Drum Rack Dispensing Bunds

Drum Rack

APPLICATION

- Drum rack designed for the storage and safe dispensing of liquids from steel and plastic 205 litre drums

FEATURES & BENEFITS

- Manufactured from, chemical resistant, UV-stabilised PE
- Ideal for easy and safe liquid dispensing
- Compatible with most forklifts, remove drums before lifting
- **Do not use plastic drums at load-bearing levels**

Code	Description	Dimensions L x W x H mm	Containment Capacity Litres	Weight kgs
DRUM RACK				
FL-205-801	2 Drum Bund	1375 x 1350 x 635	450	46
FL-205-802	2 Drum Cradle	1375 x 940 x 390		25

Poly Rack System

APPLICATION

- Provides a containment and dispensing solution by stacking drums without interrupting liquid transfer and dispensing operations

FEATURES & BENEFITS

- The base of the Poly Rack System holds 2 x 205 litre drums
- The deep dispensing well contains any incidental spills and splashes
- Easily transported by forklift when empty

POLY-STACK

- Can accommodate 2 x 205 litre drums
- Any spills from the second level are collected in the Poly Rack dispensing well for containment and easy clean-up

POLY-SHELF

- Easily attaches to the Poly-Stack and allows simultaneous dispensing from all drums

Code	Description	Dimensions L x W x H mm	Containment Capacity Litres	Weight kgs
ENPAC POLY RACK SYSTEM

PLEASE SEE PAGE 127 FOR PALLET AND CONTAINER SHIPPING QUANTITIES AND DIMENSIONS

Poly Dolly Drum Dolly

APPLICATION

- Multi-purpose dispensing station, drum transporter and secondary containment system

FEATURES & BENEFITS

- Rolled-grip handles for easy lifting and kick plate for effortless tipping
- Patented enclosed sump
- Drain plug for easy removal of liquid from sump
- Heavy duty strap to secure drum
- Forkliftable from the rear
- Optional tarpaulin cover for external use
- Optional well liner for dispensing sump
- One-person operation
- Manufactured from tough, polyethylene
- Ensures compliance with current UK Oil Storage Regulations

Code	Description	Dimensions L x W x H mm	Containment Capacity Litres	Weight kgs
ENPAC POLY DOLLY				
EN-5300-YE	Poly Dolly	1750 x 810 x 670	265	43

EN-6005-BK	Well Liner	320 x 390 x 60	1.9	5

APPLICATION

- Designed for the safe dispensing and fully bunded storage of 205 litre drums

FEATURES & BENEFITS

- Double walled construction for optimum strength and security against leaks
- Easy to clean, liquid drains to the front
- Rubber wheels
- Castors with rotation and swivel brake
- Drum is secured with a ratchet strap
- Vertical spill containment of up to 3 litres
- Forkliftable from the rear
- One-person operation, the safety support locks into place for easy vertical loading and storage
- Manufactured from tough and durable polyethylene
- Ensures compliance with current UK Oil Storage Regulations

Bunded Safety Store

APPLICATION

- Bunded store suitable for the secure storage of chemicals, oils, paints and other liquids with the exception of corrosive acids.

FEATURES & BENEFITS

- Manufactured from corrugated steel with a light grey powder coat paint finish
- Double lockable doors split 3/4 and 1/4 allow for easy access
- High and low natural ventilation
- Fully bunded sump contains any liquid spills
- Removable grid mesh floor
- Forklift pockets and crane lifting points for easy re-location on site
- Delivered fully assembled ready for immediate use or flat packed for self assembly
- Complies with the current UK Oil Storage Regulations and EPA guidelines
- Weight 600kgs

Please note this unit is not suitable for temperature sensitive liquids, low flash point flammables and corrosive acids

Hazard Hut Job Hut

APPLICATION

- Secondary external containment storage unit designed to store hazardous materials

FEATURES & BENEFITS

- Constructed as a one-piece unit from polyethylene capable of containing most liquids
- Moulded side vents for ventilation
- UV protection for increased durability when stored in direct sunlight
- Heavy duty double doors
- Allows storage for up to 4 x 205 litre drums
- Can be forklifted from all four sides for transport around site when empty
- Low incline ramp available as an optional accessory
- Manufactured in accordance with EPA 40 CFR 264.175 and UK Oil Storage Regulations
- 5 year guarantee against manufacturing defects

Code	Description	Dimensions L x W x H mm	Containment Capacity Litres	Weight kgs

Drum Store

Dual Purpose Drum/IBC Stores

APPLICATION

- Provides secure storage for 205 litre drums of chemicals, oils, paints and other liquids

FEATURES & BENEFITS

- Manufactured from sheet steel
- Incorporates galvanised floor with leakproof sump
- Lockable sliding door
- High and low natural ventilation
- Finished in corrosion resistant paint
- Suitable for forklift truck conveyance when empty
- Complies with current UK Oil Storage Regulations

Code	Dimensions L x W x H mm	Number of Drums	Containment Capacity Litres

DRUM STORE

FL-49-011	3000 x 1650 x 3100	16	880
-----------	--------------------	----	-----

APPLICATION

- Designed for the combined storage of 205 litre drums and 1000 litre IBCs.

FEATURES & BENEFITS

- Constructed from profiled mild steel sheet
- Fully welded leakproof sump
- High and low level vents
- Upper and lower levels have support bearers
- Comply with the Control of Pollution (Oil Storage) (England) Regulations 2001, The Water Environment (Oil Storage) (Scotland) Regulations 2006, E.A. Guidance Note PPG26, The Health & Safety Executives Guidelines for the Storage Of Flammable Liquids HSG51 and current Health, Safety & Environmental regulations
- Storage units can be custom made to suit your storage requirements. Optional extras may include:- insulation, heating, temperature control, lighting and fire detection

- Fastank is a patented liquid storage container designed for applications in numerous sectors including oil and chemical spill clean-up, civil defence, emergency aid and disaster relief, aquaculture, biosecurity, fire fighting, construction, military, fish-farming, and animal rescue
- Easily transported and carried to the most difficult and remote locations due to their low packaged weight and volume
- Designed to operate in a range of terrains
- Simple assembly for quick and easy deployment, no tools required
- Temperature resistant
- Range includes decontamination tanks and secondary containment bunds
- Contact your distributor for further information

Polyethylene & Steel Tanks

Steel and polyethylene tanks suitable for the storage of waste engine, heating and cooking oils, lubricants, diesel and Kerosene in all markets including manufacturing, construction, agriculture and transportation

Precision steel banded tanks are engineered and manufactured from 43a grade steel and allow for 110% bund capacity

Polyethylene tanks are manufactured in accordance with OFTEC standards

Bunded oil tanks are fully compliant with current regulations and can be supplied fitted with a wide range of dispensing equipment including electric pumps, flow meters, tank alarms and fuel management systems

Tanks can be designed and built to your specification, contact your distributor for further information

Full range of fuel tank water soakers available. Please see page 95

- Cleaning and Hygiene Products
- Emergency Repair Products
- Drain Closure Systems
- Drain Covers
- Floor Protection and Mats
- Bins

Being Ready

Absorbents

BS7959 British Standard specifies a system of colour coding of sorbent material which will assist users in identifying the correct material for use with a wide range of liquids.

Maintenance - Grey in colour, suitable for absorbing most types of industrial spills including both oil and water based liquids including solvents, coolants and mild chemicals. Recommended for internal use.

Oil & Fuel - White or blue in colour, ideal for where the absorption of oil based liquids such as fuels, lubricants and other hydrocarbon based products is required and for the selective recovery of oil from water. Recommended for external use.

Chemical - Yellow in colour, designed to absorb aggressive fluids including acids and alkalis. Recommended for internal use.

Industrial spill kits - Designed to contain and clean up spillages and limit environmental damage. Allows you to effectively respond to any oil, chemical or general liquid spills. Range of carry bags, wheelie bins and lockers with different capacities capable of dealing with a spill under a worst case scenario.

Hazardous materials spill kits - Required when you are working with hazardous materials and chemicals. Kits contain a variety of absorbent materials used to contain and clean up an acid, chemical or a body fluid spill.

Vehicle spill kits - Designed to clean up any spillages in the motor sports and commercial vehicle sector. Hauliers/transport companies of dangerous goods are required by law to provide their trucks with an ADR spill kit.

Inland water and marine spill kits - It is extremely important for boat owners to implement clean and safe boating practices when filling a fuel tank. Any splashes or spills may go directly into the water and impact on the environment.

The Ship Oil Pollution Emergency Plan (SOPEP) requires all cruise and cargo vessels to be equipped with spill kits.

Signage - Informative signage helps to protect the health and safety of employees and ensure good working practices.

Spill kit consumables - Hazardous waste bags, barrier tapes, and safety ties ensure your kits are fully maintained.

PPE, cleaning & hygiene - A range of face coverings, goggles, gloves, hand sanitising products, hard surface cleaner, workplace cleaning kit and specialised wipes help to keep your premises clean, providing a safe and healthy pleasant environment for staff and visitors.

Emergency repair products - To enable an emergency repair to damaged pipes and leaking drums.

Drain closure systems - Provide instant security against the polluting of controlled waters. Operated manually or triggered by means of automatic sensors closure systems isolate part or the whole of a site ensuring the retention of spillages or fire-fighting run-off on site.

Drain covers - Prevents debris and liquid spills entering into the drainage systems and contaminating the sewer system or controlled waters.

Floor protection and mats - Specialised mats for the, construction, clean room, food and drink, agricultural and meat producing industries.

Bins - Wheelie bins, larger capacity waste bins, clinical waste and grit bins suitable for industry.

Chemical, Solvent & Acid Spill Kits

■ SC-100-311

Formaldehyde spill kit

Contents include 4 x 950ml FNC neutraliser, 4 x 50ml activator, 1 x 200gm absorbent and immobiliser, 1 x absorbent pad, 6 x disposal bags c/w ties, 1 x pair of chemical gloves, 1 x pair of safety goggles, and facemask Supplied in a PVC yellow carry case

■ SC-100-313

Acid spill kit

Contents include 6 x 1kg acid neutraliser, 1 x absorbent pad, 1 x dustpan and brush, 6 x disposal bags c/w ties, 1 x pair of chemical gloves, 1 x pair of safety goggles. Supplied in a PVC yellow carry case

■ SC-100-315

Solvent spill kit

Contents include 6 x 10g granules, 1 x absorbent pad, 1 x dustpan and brush, 6 x disposal bags c/w ties, 1 x pair of chemical gloves, 1 x pair of safety goggles Supplied in a clip handle bag

■ SC-100-312

Multi-purpose acid, caustic and solvent spill kit

Contents include 2 x 1kg acid neutraliser, 2 x 0.9kg alkali neutraliser, 3 x absorbent pads, 1 x dustpan and brush, 6 x disposal bags c/w ties, 1 x pair of chemical gloves, 1 x safety goggles. Supplied in a PVC yellow carry case

■ SC-100-314

Caustic spill kit

Contents include 6 x 0.9kg neutraliser, 1 x absorbent pad, 1 x dustpan and brush, 6 x disposal bags c/w ties, 1 x pair of chemical gloves, 1 x pair of safety goggles Supplied in a PVC yellow carry case

■ SC-100-316

Mercury spill kit

Contents include 1 x 750gm mercury neutraliser, 1 x 180gm mercury vapour suppressant, 2 x clean-up pads, 2 x pairs chemical gloves, 1 x dust mask, 1 x pair of over shoes, 3 x mini syringes, 3 x disposal bags, 1 x collector pan and brush Supplied in a clear plastic case

Multi-purpose alkali and acid spill kit

Contents include 1 x 1kg acid neutraliser, 1 x 0.9kg alkali neutraliser, 10 x absorbent pads, 1 x dustpan and brush, 1 x disposal bag c/w tie, 1 x pair of chemical gloves, 1 x pair of safety goggles. Absorbency capacity 10litres. Supplied in a plastic carry case.

SC-100-315	Solvent
SC-100-316	Mercury

APPLICATION

- Suitable for the containment, clean-up and disposal of acid, caustic, Formaldehyde, mercury and solvent spills

FEATURES & BENEFITS

- Specific chemical spill treatment kits designed for use in laboratories
- Fast acting treatment, less time exposed to spilled chemicals
- Minimises the toxic effects of the spill
- Ease of disposal, easy to clean-up and dispose
- Portable, bright yellow carry cases can be easily taken to the spill

Portable Spill Kits

spilkleen

MADE IN THE UK

APPLICATION

- Portable, easy to carry emergency spill kits offer an effective and immediate response to spills of oils, chemicals and hazardous liquids

FEATURES & BENEFITS

- Absorbents manufactured from high quality melt blown polypropylene
- Suitable for all workplace liquid spills and leaks
- Simple to store, handle and deploy
- Ideal kits for when you are on the move
- Available in maintenance, oil & fuel and chemical versions
- Comply with BS 7959 and ISO 9001:2008 standards

Emergency Chemical spill kit

H

Spill kit located at:

I

In the event of an emergency spill, you should:

- Stop the spill immediately
- Contain the spill
- Remove the spill to a safe disposal point
- Report the spill to the appropriate authority

J

Spill kit station

K

Drain isolation kit

Use this kit to prevent spills entering the local drains

L

MADE IN THE UK

Safety Signs

APPLICATION

- Informative signs to help protect the health and safety of employees and workplace visitors

FEATURES & BENEFITS

- Draw attention to health and safety hazards
- Indicate where emergency equipment is located
- Provide general information and directions
- Ensures best practice is standard within an organisation

All signs are available in a choice of:

RIGID PLASTIC (RP)

- Manufactured from glossy, lightweight rigid PVC plastic for high impact strength
- Suitable for internal and external use

SELF ADHESIVE VINYL (SAV)

- Manufactured in high gloss, flexible PVC with self adhesive backing
- Suitable for internal use only

Handling Chemicals Safely

A-Frame Safety Sign

APPLICATION

- Highly visible A-frame folding safety sign to warn employees of a hazardous spill

FEATURES & BENEFITS

- Manufactured from 4mm fluted polypropylene
- Lightweight and waterproof
- Foldable for easy storage when not required
- Double sided
- Dimensions 300 x 600mm

Code	Description
SELF STANDING FOLDING SIGN	
FL-123-030	Caution Hazardous Spill

APPLICATION

- Provides staff and visitors with important safety information

FEATURES & BENEFITS

- Manufactured in rigid plastic
- Height x width 600 x 400mm

Code	Description

FL-123-002	Handling Chemicals Safety Poster

NEW**MADE IN THE UK**

Mobile Display Unit

APPLICATION

- Mobile display unit for multiple applications including risk information board, first aid point, fire response station, lock-out tag control station, site traffic management board and as an information point

FEATURES & BENEFITS

- Fully mobile, fitted with 200mm diameter wheels
- Easy to assemble and dismantle when no longer required
- Highly customisable to suit varying customer requirements
- Products attach to the backboard using self-tapping screws or bolts (not supplied)
- Ballast or additional tool storage box in base
- Manufactured from recyclable, chemical resistant, UV stabilised MDPE
- Dimensions height x width x depth 1725 x 755 x 595mm
- Weight 26.5kgs

Please note products shown are not included

Spill Kit Accessories

Security Tape

APPLICATION

- Designed for securing spill kit lids

FEATURES & BENEFITS

- Supplied in a highly visible blue colour
- Leaves a visual indication to alert spill kit users to evidence of tampering
- Dimensions 25m long x 50mm wide

Code	Description
------	-------------

SECURITY TAPE

FL-121-001	Security Tape
------------	---------------

Tamper Proof Ties

APPLICATION

- Suitable for securing wheeie bin and static locker emergency spill kit lids

FEATURES & BENEFITS

- Indicates clearly if the bins have tampered with
- Seals can be broken by hand allowing quick and easy access without the need for knives or snips
- Highly visible red colour
- Dimensions length x width 230 x 2mm
- Supplied in packs of 100

Code	Description

Fossetex Wipe Roll

APPLICATION

- Suitable for dealing with spills of oil and water based liquids in most industrial workshops and automotive environments

FEATURES & BENEFITS

- Efficient and economical
- Individual sheet dimensions 40 x 38cm
- Roll length 380m

Code	Description	Sheet size
SPILKLEEN FOSSETEX WIPE ROLL		
SK-08-107	Fossetex Industrial Wipe Roll	40 x 38cm

Maintenance Wipe Rolls

APPLICATION

- General purpose industrial maintenance wipes suitable for use in all manufacturing industries

FEATURES & BENEFITS

- Tough absorbent cellulose fibres with good wet and dry strength capabilities
- Resistant to solvents, oils, grease and water
- Tear resistant
- Low lint properties
- 400 sheets per roll
- Colour white
- Pack quantity 2

Code	Description	No. of rolls per pack	Sheet size
SPILKLEEN MAINTENANCE WIPE ROLLS			
FL-67-109	Industrial Wipe	2	20 x 35cm

Lax60 Industrial Multi Purpose Wipes

APPLICATION

- Industrial wipe suitable for use as an alternative to traditional white cotton and mixed rags
- Ideal for use in the construction, catering and manufacturing industry sectors

FEATURES & BENEFITS

- Highly absorbent, can be used with solvents and cleaning products
- Low-linting
- Cleans up oils, lubricants, solvents and water spills
- Suitable as an excellent disposable towel in kitchen environments
- Easy to dispense from the pop-up box
- Sheet size 30 x 50cm, 150 sheets per box

Code	Description	Colour
LAX60 INDUSTRIAL MULTI PURPOSE WIPES		
FL-67-100	Lax60 Industrial Multi Purpose Wipes	White

Sontek65 Industrial Multi Purpose Wipes

APPLICATION

- Multi-purpose wipe suitable for use in the aviation, manufacturing, food, production and pharmaceutical industries

FEATURES & BENEFITS

- Tough and durable
- Absorbs up to six times its own weight of fluids
- Low-linting, ideal for use on stainless steel surfaces
- Re-usable
- Cleans up oils, lubricants and water spills
- Designed to not break down with solvents and water spills
- Excellent performance both wet and dry
- Sheet size 30 x 40cm, 280 sheets per roll

Code	Description	Colour

FL-67-101	Sontek65 High Absorbency Jumbo Roll (case of 2)	Blue

Professional Universal Bucket Wipes

APPLICATION

- Universal heavy duty wipe suitable for cleaning operators hands, tools machinery and most surfaces in all industrial sectors

FEATURES & BENEFITS

- Pre-moistened so no need for additional water
- Removes oils, grease, paint and much more
- Conforms with IEC 1223/2009 Cosmetic Directive
- Sheet size 27 x 26cm, 150 sheets per bucket

Code	Description	Colour
PROFESSIONAL UNIVERSAL BUCKET WIPES		
FL-67-103	Professional Universal Bucket Wipes (case of 4)	White

Rough And Smooth Heavy Duty Wipes

APPLICATION

- Universal wipe suitable for cleaning operators hands, tools, machinery and most surfaces in all industrial sectors.

FEATURES & BENEFITS

- Especially suited to mobile workers as pre-moistened so no need for water
- Skin patch tested as safe to use on skin, contains aloe-vera for keeping hands moisturised
- Dual sided with micro beaded side for agitating grime, smooth side for wiping away
- Removes semi cured silicone, sealant, decorators caulk, oils, grease, adhesive, water-based paints, inks, expanding foam and more
- Conforms with EC1223/2009 Cosmetic Directive
- Sheet size 22 x 20cm, 80 sheets per tub

Code	Description	Colour
ROUGH AND SMOOTH HEAVY DUTY WIPES		
FL-67-102	Rough And Smooth Heavy Duty Wipes (case of 8)	Blue/White

Trademate Rayon Bamboo Pro Wipes

APPLICATION

- Environmentally friendly general purpose hand wipes suitable for cleaning operators hands, tools, machinery and most surfaces

FEATURES & BENEFITS

- Out performs polypropylene (plastic) wet wipes
- 100% bio-degradable manufactured from sustainable plant sources
- Oeko-tex 100% certified with no harmful substances
- Conforms to Cosmetic Directive EU1223/2009, bacteria tested to BS EN 1276

Code	Description	Colour
TRADEMATE RAYON BAMBOO PRO WIPES		
FL-67-105	Trademate Rayon Bamboo Pro Wipes (case of 8)	White

Trademate Bamboo Pro Wipes

APPLICATION

- General purpose hand wipe suitable for decorators, mechanics and general engineering workshops

FEATURES & BENEFITS

- Manufactured with 80% Eco-Friendly bamboo fibre, 100% biodegradable and fully sustainable
- Stronger than paper works like a traditional cleaning cloth, reduces waste
- Low-linting, no fibres left on surface
- Solvent resistant, cleans up oils, lubricants, adhesives, inks, paints and water spills
- Sheet size 28 x 26cm, 55 sheets per roll

Code	Description	Colour

NEW**MADE IN THE UK**

Personal Protective Equipment

Disposable Protective Face Mask

APPLICATION

- Suitable for use in non-surgical environments, public transport, schools, universities, supermarkets and public areas

FEATURES & BENEFITS

- Protects against respiratory bacteria and wet particles
- Manufactured from non-woven hypoallergenic sterilised fabric
- BFE 95 meltblown filter aids good permeability
- Ear loops for long term wearer comfort
- Filtration efficiency >90%
- Operating conditions: -20 to +40 deg C, relative humidity <85%
- One size fits all
- Pack of 50 face masks

Code	Description	Quantity Per Pack
DISPOSABLE PROTECTIVE FACE MASK		
FL-67-205	Disposable Face Mask	50

Washable Face Coverings

APPLICATION

- Suitable for use in non-surgical environments, public transport, schools, supermarkets and public areas

FEATURES & BENEFITS

- Not certified for health care use, but provides a barrier between respiratory droplet transmission and significantly prevents inhalation of droplets present in the environment
- Manufactured from 100% GOTS and Oeko-tex certified organic cotton 120g/m² with a second layer of non-woven textile 40g/m²
- Washable, up to 150 times
- Dimensions length x width 17 x 11cm
- Colour white

MAINTENANCE

- After use
- Boil in hot water for 3 minutes or machine wash at 60deg C
- Do not use detergent
- Dry fully
- Iron to complete sterilisation process

Code	Description	Quantity Per Pack
WASHABLE FACE COVERINGS

FL-67-007	Nitrile Gloves Extra Large	1000
FL-67-008	Nitrile Gloves Extra Large	100

HEAVY DUTY GLOVES

APPLICATION

- Chemical handling heavy duty applications

FEATURES & BENEFITS

- Fingers, thumbs and palms are textured for increased grip
- Flocklined interior provides increased comfort and absorbs perspiration
- Conform to European PPE Directive 89/686/EEC and are tested to European Standards EN 420, EN 388, EN374 and EN 1149

Code	Description	Quantity Per Pack
HEAVY DUTY NITRILE GLOVES		
FL-67-009	Heavy Duty Medium	12
FL-67-010	Heavy Duty Large	12
FL-67-011	Heavy Duty Extra Large	12

Safety Goggles

APPLICATION

- Protects the wearer from eye injury against moderate impact hazards and chemical liquid splash

FEATURES & BENEFITS

- Ergonomically designed PVC frame
- Polycarbonate clear lens
- Indirect ventilation
- Chemical splash resistant
- Manufactured to EN166-1B

Code	Description
SAFETY GOGGLES	
FL-67-2050	Chemical Splash Resistant

PPE Safety Pack

APPLICATION

- Provides immediate access to protective clothing in the event of a liquid spill, for site visitors or occasional and temporary workers

FEATURES & BENEFITS

- Contents include 1 x large protective coveralls, 1 x pair of overshoes, 1 x pair large Nitrile gloves and 1 x pair chemical splash resistant goggles

Code	Description

FL-67-034	PPE Safety Pack

NEW**MADE IN THE UK**

Hand Sanitising Stations Hand Sanitising Gel

APPLICATION

- Suitable for deployment in manufacturing industries, offices, hospitals, medical centres, airports, shops, hotels, restaurants, sports centres, schools, universities and many more

FEATURES & BENEFITS

- Robust steel construction hand sanitising dispensing stations
- No power supply required
- Accurate dispensing for economical usage
- Easy to clean
- Extremely mobile with the option of being fixed to the floor
- Suitable for both internal and external use

Foot Operated

ADDITIONAL FEATURES

- Avoids any cross contamination between users
- Storage for 2 x 5 litre bottles inside the unit
- Dimensions: Body height x width x depth 128 x 20 x 20cm
Base length x width x thickness 50 x 39cm

FEATURES & BENEFITS

- Eliminates 99.9% of germs, effective against bacteria, fungi, viruses, grease and oils
- Works faster and is more effective than soap and water
- No water or towels required
- Fast drying
- Fragranced with the scent of lavender

Sanitising Wipes Sanitising Kit

Quat-Free Surface Sanitising Wipes

APPLICATION

- Suitable for cleaning and sanitising food preparation areas, work surfaces, stainless steel utensils and equipment in the catering, hospitality, education and manufacturing sectors

FEATURES & BENEFITS

- Triple layer, blue non woven wiping material
- Disinfects and sanitises all work surfaces and equipment, 99.99% kill rate
- Quat-Free, biguanide free, alcohol free, taint free, food safe
- Biocidal Product approved BPR Article 95 as amended by Regulation (EU) 334/2014
- Outstanding microbial performance against gram positive and gram negative bacteria, yeast and viruses
- Test strains P.Aeruginosa, S.Aureus, E-Coli, E.Hirae, C.Albicans, Influenza Type A (H1N1), Vaccinia Virus BVBV, Mycobacterium Terrae
- Available in a bucket containing 1000 sheets or a handy canister containing 250 sheets
- Sheet size 20 x 20cm

Drum & Pipe Repair

Plug N Dyke Putty

APPLICATION

- Provides a temporary seal in damaged leaking drums

FEATURES & BENEFITS

- Applied directly over the leak to form an immediate seal
- Oil and petrol resistant
- Can be applied to dirty, greasy or rusty surfaces without any preparation
- Manufactured from a non-toxic material
- 5 year shelf life providing it remains unopened and is stored out of direct sunlight

Code	Description
------	-------------

PLUG N DYKE PUTTY

FL-42-501	Plug N Dyke Putty 0.5kg

Quick Wrap Bandage

APPLICATION

- Suitable for emergency repairs to gas, oil, water, waste pipes and chemical lines

FEATURES & BENEFITS

- Quick and easy to use
- Good temperature, pressure and chemical resistance
- Sets in under 10 minutes and is fluid compatible
- No mixing or measuring, simply soak in water for 10 seconds
- Food safe when cured

Code	Description	Dimensions W x L

Strap It Leak Stopper

APPLICATION

- Emergency leak stopper designed for all pipe work systems

FEATURES & BENEFITS

- Simply wraps over the leak and locks with hook and loop system
- Seals leaks under pressure without having to shut down the system
- Manufactured from EPDM rubber
- Chemical resistant
- Temperature range -40 to 120 deg C
- No tools required, can be reused time and time again

Code	Description	Pressure Tested Bar

Drain Guards

APPLICATION

- Prevents sediment and other pollutants from entering the drain system

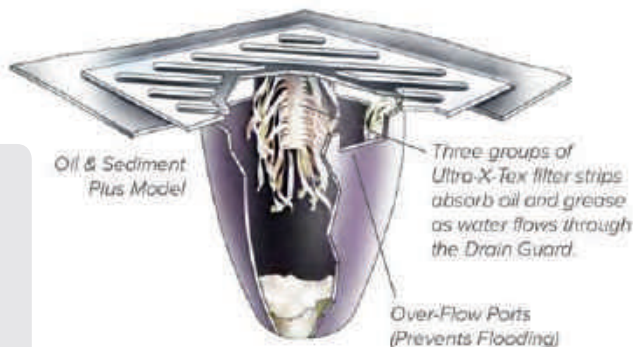

FEATURES & BENEFITS

- Quick and easy installation, simply lift the grate, lower the drain guard into position and replace the grate pinching the fabric in place to keep the unit secure
- Excess fabric can be trimmed to suit the drain size
- Easily emptied and reused
- Reduces the amount of sediment, debris, cigarette butts, litter, grasses and leaves from entering the drain system
- Suitable for use on construction sites, industrial car parks, hospitals, and retail facilities
- Avoids the cost of pumping out the drain systems to clear blockages
- Custom sizes available

Oil & Sediment Model Removes hydrocarbons, dirt, sand and other contaminants.

Oil & Sediment Plus Model The addition of Ultra-X Tex filter strips increases oil and grease absorption.

Debris Model Designed specifically to catch larger items and floatables such as leaves, cigarette butts and paper goods.

NEW**MADE IN THE UK**

Drainblok

APPLICATION

- Allows the temporary sealing, blocking of drains, ducts and pipes without the operator having to gain entry into a confined space or even a hazardous area

FEATURES & BENEFITS

- Quick and easy to install
- Inflates in seconds to provide a liquid tight seal in the pipe system
- Resistant to most oils, fuels and non aggressive chemicals
- Easy to clean after use for future deployment
- Reduces the potential pollution risk of hazard fire water runoff
- Supplied as a kit containing low pressure inflator pump unit, 3m extending pole, stopper fitted with 5m airline, manhole keys, operator instructions and storage bag
- Drainblok can be installed permanently requiring the use of an optional accessory post and fire box to contain the pump unit

Code Drain Kit Diameter

DRAINBLOK

FL-92-110	Drainblok 100mm

FL-92-114	Drainblok 375mm
FL-92-115	Drainblok 425mm
FL-92-116	Drainblok 600mm

APPLICATION

- Fully contained drain closure system for preventing liquid spills and fire water runoff escaping through the drainage system resulting in a pollution release

FEATURES & BENEFITS

- Stops the liquid drainage flow within seconds of activation, staying fully locked even if the control panel is destroyed by fire
- Fully contained system, supplied complete with self powering control panel and stand
- System can be powered by mains, solar or battery
- The system can be connected to an existing fire alarm system for automated response or operator push button to close the valve
- Can be retrofitted to most existing drainage systems as well as all new builds
- Control panel functions include mains power charge indicator, low battery warning light, auxiliary alarm outputs
- Control options as standard include GSM automation, SMS / Email reporting, mains power charge, low power radio control, auxiliary alarm outputs, an optional cloud based data logger is available

Please contact your distributor to arrange for one of our engineers to visit your site to discuss all options and conduct a site survey of your drainage system

MADE IN
THE UK

Separator Alarms

APPLICATION

- Monitor oil, silt and liquid levels within underground separators to ensure the correct operation of separators preventing pollutants entering into the drain system

FEATURES & BENEFITS

- The system comprises of a control panel linked up to the probe sensors that monitor the oil, silt and liquid levels in the separator and if and when excessive levels are reached the alarm is activated
- Informs you when the separator requires emptying, reducing waste management costs
- Retro fit to most existing separators
- Mains or solar powered systems available
- Prevents environmental fines and clean up costs
- Typically one day installation with minimal civil works
- **Please contact your local distributor to arrange a site visit and survey**

MADE IN THE UK

Drain Protection

Conical Plugs

APPLICATION

- Prevents liquid spills from entering circular drains

FEATURES & BENEFITS

- Easy to install and remove
- Flexible, chemical-resistant polyurethane plug forms a tight seal in conical drains
- Cleans easily with soap and water for reuse
- Non-permanent alternative to sealing drains with cement

Code Dimensions Plug

FL-42-409	170 to 230 x 200

Drain Gully Socks

APPLICATION

- Specifically designed for the absorption of oils and hydrocarbons from drain gullies

FEATURES & BENEFITS

- Easy to deploy and collect
- Lightweight, clean and efficient
- Highly absorbent, can absorb up to 20 times its own weight in oils
- Will float on the surface even when fully saturated
- The bioactive gully sock reduces separator cleaning by digesting up to 2kg of oil every week for up to 6 months

Code	Description	Dimensions Dia x L mm	Pack Quantity
DRAIN GULLY SOCKS			
FL-01-201	Standard Sock	200 x 500	2
FL-01-202	Bio-Active Sock	200 x 500	1

Spill Barrier

APPLICATION

- Suitable for containing spills and preventing liquids from entering a drain

FEATURES & BENEFITS

- Resistant to oils and most chemicals
- Manufactured from non-absorbent polyurethane
- Quick to deploy and provides essential protection for drains
- Suitable for use on slopes and uneven surfaces
- Washable with detergent and water for reuse

Code Dimensions L x W x H mm

DRAIN BARRIER

FL-42-401	3000 x 70 x 100
-----------	-----------------

Drain Marking Kit

NEW

APPLICATION

- Drain marking kits provide a means of colour coding drains to differentiate between surface and foul water

FEATURES & BENEFITS

- Kit contents include 1 x red aerosol paint, 1 x blue aerosol paint, 1 x arrow stencil board, dustpan and brush, 4 x pairs of poly gloves and 2 x waste disposal bags. Supplied in a clip handle PVC carry bag

Code Description

DRAIN MARKING KIT

FL-42-110	Drain Marking Kit

MADE IN THE UK

Drain Covers

Plug Rug Drain Cover

APPLICATION

- Prevents any liquid spills flowing into drains and contaminating controlled waters

FEATURES & BENEFITS

- Can be moulded for use on all types of drains
- 100% seal even on rough ground
- Remains flexible down to -20°C
- Resistant to oil, water and most chemicals
- Single use only
- PVC storage bag available
- 5 year shelf life providing it remains unopened

Code	Dimensions L x W x H mm	Pack Quantity	Weight kgs
PLUG RUGS			
FL-42-301	650 x 450 x 20	4	28
FL-42-303	405 x 405 x 20	4	16

PLUG RUG BAG			
FL-42-102	650 x 460	1	0.5

Neorug Drain Cover

APPLICATION

- Prevents any liquid spills flowing into drains and contaminating controlled waters

FEATURES & BENEFITS

- Manufactured from neoprene
- Can be used on any surface
- Resistant to oil, water and most chemicals
- Reusable after washing for future use
- Storage bag available

Code	Dimensions L x W mm	Weight kgs
NEORUG DRAIN COVER		
FL-42-101	1000 x 1000	3
NEORUG STORAGE BAG		
FL-42-206	1100 x 170	0.5

Magnetic Drain Cover

APPLICATION

- Ideal for placing on steel drum storage units near to drain systems where hazardous liquids are stored and in exposed areas

FEATURES & BENEFITS

- Manufactured from flexible polyurethane that provides tight adherence to metal drains
- Will attach to metal drain surfaces that are free of dirt and debris
- Re-usable, compact and lightweight
- Resistant to weather and temperature -20°C to +80°C
- Resists acids and alkalis

Code	Dimensions L x W mm	Weight kgs
MAGNETIC DRAIN COVER		
FL-42-204	600 x 600	2.5

Drain Covers

Sticky Polyurethane Drain Cover

APPLICATION

- Prevents liquid spills entering drain grates, and sealing plates in the event of an accidental hazardous liquid spill

FEATURES & BENEFITS

- Resistant to oil, water, petrol, jet fuel and most chemicals
- Composition: top PES and silicon, bottom 100% polyurethane
- The contact side of the drain cover is sticky creating an effective seal around the drain
- Two strengthened carry handles assist handling and deployment
- A date indicator gives the month and year of manufacture, shelf life 5 years for unused product
- Reusable after washing with soapy water
- Storage bag available

Code	Dimensions L x W x H mm	Weight kgs
------	-------------------------	------------

STICKY POLYURETHANE DRAIN COVER

FL-42-208	450 x 450 x 11	6

DRAIN COVER STORAGE BAG

FL-42-203	1100 x 170	
-----------	------------	--

Transparent Drain Cover

APPLICATION

- Forms a seal to prevent any liquid spills flowing into drains

FEATURES & BENEFITS

- Clear material provides unobstructed view of covered drains and enables responders to ensure a complete seal
- Manufactured from 100% polyurethane
- Reinforcing mesh is sandwiched between layers of polyurethane for additional strength
- Resistant to oil, water and most chemicals
- Reusable after washing with soapy water for future use

Code	Dimensions L x W x H mm	Weight kgs
------	-------------------------	------------

ULTRATECH TRANSPARENT DRAIN COVER

MADE IN THE UK

Protective Mats

Sticky Backed Floor Rolls

APPLICATION

- Ideal for installing alongside production machines, walkways, workbenches and counter tops

FEATURES & BENEFITS

- Traps oils, greases and water based liquids
- Heavy weight polyester/polypropylene needle punch fabric
- Adhesive backing prevents movement and ensures a tight grip to most surfaces
- Quickly and easily peeled up when replacement is required
- Easily cut to size

Code	Colour	Dimensions L x W
STICKY BACKED FLOOR ROLLS		
SC-08-115-B	Grey	15m x 86cm
SC-08-114-B	Grey	30m x 86cm

TAKmats

APPLICATION

- Control foot-borne contamination from entering or leaving work areas in electronics industry, food and drink, laboratories, construction and paint spray booths

FEATURES & BENEFITS

- Super dust absorbent
- 36 impregnated cotton covers enclosed in a heavy plastic frame with a super dust absorbent cushion foam interior
- Top layer can be removed when soiled to reveal a clean layer
- Quick to install

Code	Dimensions L x W mm	Pack Quantity
TAKMATS

FL-04-305	1520 x 910	1

Disinfectant Pedestrian Mats

APPLICATION

- Provide a quick and effective way to disinfect footwear and avoid the spread of contamination

FEATURES & BENEFITS

- Extremely hardwearing and can be positioned on any flat surface

- Absorbent matting contained within a PVC coated polyester envelope
- Disinfectant is transferred evenly without splashing which reduces wastage
- Replenish disinfectant when required (see page 79)

Code	Dimensions L x W m	Containment Capacity Litres	Weight kgs

MADE IN THE UK

Disinfectant Vehicle Mats

Disinfectants

APPLICATION

- Dispenses disinfectant onto the tyres of vehicles to aid biosecurity in dairies, farms, poultry sheds, food factories, horticulture units, zoos, stables and agricultural shows.

FEATURES & BENEFITS

- Extremely hardwearing
- Absorbent matting contained within a PVC coated polyester envelope
- The disinfectant is transferred evenly onto the tyres without splashing which reduces wastage
- Disinfectant does not contaminate the surrounding area
- Easy to transport and can be used on any flat surface
- Easy fix bolts provided
- Replenish disinfectant when required
- Two mats per pack

Code	Application	Dimensions L x W m	Containment Capacity Litres	Weight kgs

By law you must use a Department for Environment Food & Rural Affairs (Defra) approved disinfectant when there is an outbreak of a notifiable disease.

Notifiable diseases can be:

Endemic already present in the UK, such as bovine TB

Exotic not normally present in the UK, such as Foot & Mouth, Swine Vesicular Disease and Avian Influenza

APPLICATION

- Developed for use with biosecurity vehicle and pedestrian disinfectant mats

Code	Name	Application	Size
DEFRA APPROVED DISINFECTANT			
FL-04-502	BioShield P Liquid Disinfectant	Routine disinfection Vehicle mats Foot and mouth disease Swine vesicular disease Avian influenza & Newcastle disease	4 x 5lts
FL-04-501	BioVX Disinfectant Powder	Routine disinfection Vehicle mats Foot and mouth disease Swine vesicular disease Avian influenza & Newcastle disease	10kgs

Folding Pallet Box Bin Storage

Collapsible Folding Pallet Boxes

APPLICATION

- Suitable for use in factories, warehouses and recycling plants for the storage and transportation of goods

FEATURES & BENEFITS

- Manufactured from high-density polyethylene
- Easy to fold and erect
- Four way entry for fork and pallet trucks
- Temperature range -20°C to +40°C
- Capacity 640 litres
- Folds flat when not in use to save space and transport costs on any return transport
- Lid available as an accessory

Code	Description	External Dimensions L x W x H mm	Internal Dimensions L x W x H mm	Weight kgs
FOLDING PALLET BOX				
FL-144-006	Pallet Box Vented Sides	1200 x 1000 x 810	1120 x 920 x 625	45

FL-144-005	Universal Lid	1200 x 1000 x 40		

Grit Bins

APPLICATION

- Suitable for the storage of absorbent granules, sand and winter salt

FEATURES & BENEFITS

- Manufactured from heavy duty UV stabilised PE
- Angled design allows water to run off
- Large opening for easy access
- Forklift and pallet truck access
- Chemical and temperature rang -35 to +50 deg C

Code	Descriptions	Dimensions L x W x H mm	Weight kgs
GRIT BIN

FL-69-006-Y	Grit/salt Bin 400 Litre	1000 x 755 x 885	24.5

Static Locker Bins

APPLICATION

- Static locker bin suitable for both internal and external use

FEATURES & BENEFITS

- Manufactured from medium density UV stabilised polyethylene
- Suitable for use with liquids or dry powders
- Integral base fork pockets for easy movement
- Fitted with a lockable hinged lid for additional security
- Colour yellow

Code	Description	Dimensions L x W x H mm	Weight kgs

Mobile Storage Cart Wheelie Bins

Mobile Storage Cart

APPLICATION

- Mobile bin cart suitable for applications including the storage of absorbent materials and winter salt

FEATURES & BENEFITS

- Suitable for both internal and external use
- Manufactured from 100% recyclable chemically resistant PE
- Heavy-duty design with robust rubber wheels and angled lid for rain water run-off
- Ergonomic handle for ease of use
- Lid can be secured in the vertical position for convenient dispensing and loading of materials
- Easy to clean
- Containment capacity 75 litre
- Temperature range -35 to +50 degree C

Code	Description	Dimensions L x W x H mm	Containment Capacity Litres
MOBILE STORAGE CART			
FL-69-110	Mobile Storage Cart	590 x 435 x 1070mm	75

Wheelie Bins

APPLICATION

- Suitable for use in all industrial and domestic environments

FEATURES & BENEFITS

- Manufactured from high density polyethylene
- Resistant to weather conditions and UV rays
- Fitted with sturdy rubber wheels
- Available in blue, grey, green, red and yellow

Wheeled Bins Bin Accessories

APPLICATION

- Suitable for use in all warehouses, factories and construction sites

FEATURES & BENEFITS

- Manufactured from high density polyethylene
- Resistant to extreme temperatures and weather conditions
- Reinforced hinges and ergonomic side handles
- Compatible with standard lifting mechanisms
- 200mm rubber tyres on swivel castors for full mobility
- Two central wheel locks
- Optional accessories include fitted locks, paper slots and bottle bank lids
- Available in blue, grey, green, red and yellow

Drop Front Wheeled Bins

APPLICATION

- Suitable for use in all warehouses, factories and construction sites

FEATURES & BENEFITS

- Allows for easy access and avoids unnecessary lifting by allowing waste to be disposed of and removed using the drop front feature
- Manufactured from high density polyethylene
- Resistant to extreme temperatures and weather conditions
- Reinforced hinges and ergonomic side handles
- Compatible with standard lifting mechanisms
- 200mm rubber tyres on swivel castors for full mobility
- Two central wheel locks
- Available in blue, grey, green, red and yellow

Clinical Waste Bins

APPLICATION

- Suitable for safely collecting and disposing of medical waste and contaminated PPE in hospitals, doctors surgeries, veterinary and dental practices including all other emergency blue light services

FEATURES & BENEFITS

- Manufactured from tough high density polyethylene resistant to all weather conditions, UV rays, acids and alkalis
- Close fitting lid with lock aids security and prevents any spillage and unpleasant odours from emanating reducing exposure and handling risk
- Fitted with sturdy rubber wheels that allow for maximum mobility even when fully loaded
- Supplied complete with lock, key and hazard label
- Compatible with most standard lifting mechanisms
- Available as a standard 2-wheeled wheelie bin, 4-wheeled and 4-wheeled drop front high volume bins
- Colour yellow

- Chemical Neutralisation
- Marine & Inland Water Oil Spills
- Flood Protection
- Spill Care

Controlling A Spill

Absorbents

BS 7959 British Standard specifies a system of colour coding of sorbent materials which will assist users in identifying the correct materials for use with a wide range of liquids.

Maintenance - Grey in colour, suitable for absorbing most types of industrial spills including both oil and water based liquids including solvents, coolants and mild chemicals. Recommended for internal use.

Oil & Fuel - White or blue in colour, ideal for where the absorption of oil based liquids such as fuels, lubricants and other hydrocarbon based products is required and for the selective recovery of oil from water. Recommended for external use.

Chemical - Yellow in colour, designed to absorb aggressive fluids including acids and alkalis. Recommended for internal use.

HSE recommendation on chemical spills - Liquid spills involving hazardous materials should first be contained to prevent spread of the material to other areas. Once the hazardous material has been contained the material should be neutralised to render it safe. Acids and alkalis should be neutralised with appropriate neutralising agents.

Pads - manufactured from polypropylene fibre in two brands, Spilkleen and Spilchoice, available in maintenance, oil and fuel and chemical and in light, medium and heavy weight options with varying levels of absorption to suit customers requirements.

Spilkleen - simple and effective

Manufactured from a single layer meltblown which provides fast absorption but limited durability.

Spilchoice - performance and endurance

Single lamination where a thin layer of 'no lint' spunbond material is sonically attached onto the top surface of the pad, this greatly reduces the linting, (fibres coming off easily) and improves the strength considerably.

Double lamination construction where the pad has both surfaces covered with a non-linting strong spunbond cover. This configuration is the best for durability and results in the pad having virtually no linting at all and can resist rips and abrasions even when wet.

Rolls - manufactured from polypropylene fibre absorbents. Designed to cover large areas and walk-ways. Perforated rolls can be an effective way of dispensing by tearing off the pad at each perforation. The poly-backed version is ideal for MRO applications as the PVC lamination prevents the spill from contaminating the surface beneath. Available in maintenance, oil and fuel and chemical variants to suit individual requirements.

Cushions - absorb leaks that are too large for pads and where access is restricted. Manufactured from stitched spunbond or knitted outer fabric and fill. Available in maintenance, oil and fuel and chemical variants.

Socks - contain spills around equipment and prevent a spill from spreading. Suitable for both internal and external applications. Manufactured from stitched spunbond or knitted outer fabric and fill. Available in maintenance, oil and fuel and chemical variants.

Granules - provide an effective solution for absorbing chemical, oil, and water spills both internal and external.

Dispensing stations - provide efficient and rapid response to spills, available in mobile, floor and wall mounted options.

Chemical neutralisation - integrating chemical neutralising products into a spill response plan will reduce disposal costs by converting hazardous waste to general waste. Neutralisation is recognised as an important element for spill response safety.

Marine & inland water oil spills - specific products that provide an effective solution for dealing with an oil spill in open and enclosed waters.

Flood protection - innovative products designed to create a highly effective barrier to the threat of floodwater including leaks and spills in the domestic and commercial market.

NEW
MADE IN THE UK

Absorbent Powder

■ SK-03-115

■ SK-03-109

■ SK-03-114

■ SK-03-110

DIRECTIONS FOR USE

Step 1 - Pour the spill powder around the outside of the spill and then begin to pour the powder towards the centre of the spill.

Step 2 - As the solution begins to solidify mix in the powder to absorb the spill. Depending on the surface, type of liquid and depth/volume of the spill that has occurred this can vary in time

Step 3 - With a hard surface the spill area can be cleaned up with a brush and dustpan. Contaminated waste must be disposed of in line with local authority guidelines

APPLICATION

- Absorbs the vast majority of liquids including oils, fuel, water, chemicals, acids (excluding Hydrochloric), paint, adhesives, food and dairy products, body and animal waste products

FEATURES & BENEFITS

- Extremely fast acting emergency spill response powder suitable for both industrial and non industrial market sectors
- Leaves no residue on surfaces reducing the risk of slips or further cross contamination
- Suitable for use on wooden floors, concrete, tarmac, brickwork, ceramic tiles, metal, carpet, leather and upholstery
- Antibacterial, food safe as contains no chemicals
- Eliminates up to 80% of lingering odours
- Non combustible
- Absorbs up to 10 times its own volume for economical use
- Internal use only

CLAY GRANULES

PLUS

BATTEREEZY

SAFE-SOAK

SPILL-AID

CLAY GRANULES

- Provide efficient clean-up of oil, fuel and water based liquids
- Remains granular even when saturated
- Non-flammable

PLUS

- Suitable for internal use on oil, fuel and water based spills
- Manufactured from 100% recycled materials

SAFE-SOAK

- Manufactured from 100% recycled materials
- Environmentally acceptable by-product which fulfils government guidelines on recycling
- Non-flammable

SPILL-AID

- Suitable for absorbing liquid or semi-liquid spills of animal, mineral, chemical or vegetable based substances except hydrofluoric acid
- Lightweight, non-toxic, non-flammable and environmentally safe
- Reduces the cost of clean up, labour and materials

BATTEREEZY

- Specifically for the neutralisation of sulphuric acid
- Once the reaction has completed the granules will adopt a darker colour
- Can be disposed of as general waste once the reaction has finished

SC-05-305-B	Medium Weight Non Linting	A,B,C,D,E,G	35 x 40	0.8	100

APPLICATION

- Suitable for maintenance, repair and heavy duty clean up operations in the industrial working environment

FEATURES & BENEFITS

- Includes all the features of the Spilkleen range of absorbent pads plus
- A layer of spunbond material is attached to the top surface of these pads which reduces linting and improves the overall strength
- Double lamination is where the pad has both top and bottom surfaces covered with a spunbond cover which results in a non linting pad

Rolls

spilkleen

MAINTENANCE

Grey in colour, suitable for absorbing most types of industrial spills including both oil and water based liquids including solvents, coolants and mild chemicals. Recommended for internal use.

OIL & FUEL

White or blue in colour, ideal for where the absorption of oil based liquids such as fuels, lubricants and other hydrocarbon based products is required and for the selective recovery of oil from water. Recommended for external use.

CHEMICAL

Yellow in colour, designed to absorb aggressive fluids including acids and alkalis. Recommended for internal use.

A ROLLS B DIMPLED C PERFORATED D BOX E BAG

MELTBLOWN

APPLICATION

- Designed to cover large areas, walk-ways and for the containment of larger spills

FEATURES & BENEFITS

- Manufactured from a single layer of meltblown absorbent
- Bonded and dimpled for additional strength where indicated
- Perforated down their entire length and width to minimise waste where indicated
- Different absorbency rates to suit customers requirements
- Reliable performance

HSE RECOMMENDATION ON CHEMICAL SPILLS

- Liquid spills involving hazardous materials should first be contained to prevent spread of the material to other areas. Once the hazardous material has been contained the material should be neutralised to render it safe. Acids and alkalis should be neutralised with appropriate neutralising agents. Please see pages 102 - 103.

CHEMICAL

Yellow in colour, designed to absorb aggressive fluids including acids and alkalis. Recommended for internal use.

SPUNBOND FABRIC

APPLICATION

- Ideal for absorbing liquids in tight restricted spaces

FEATURES & BENEFITS

- Spunbond outer surface that is both fast wicking and tough
- The absorbent core is secured into the pillow shape at each end with a stitched seam
- Cushions are used to absorb leaks that may be too large for a pad
- Available in boxes or bags

HSE RECOMMENDATION ON CHEMICAL SPILLS

- Liquid spills involving hazardous materials should first be contained to prevent spread of the material to other areas. Once the hazardous material has been contained the material should be neutralised to render it safe. Acids and alkalis should be neutralised with appropriate neutralising agents. Fuel Tank Water Soakers

APPLICATION

- Ideal for use in commercial fuel tanks, domestic heating oil tanks and bulk diesel tanks to prevent corrosion

FEATURES & BENEFITS

- Condensation causes water to collect in the bottom of fuel tanks which if not removed corrodes the inside of the tank
- Water soaker is lowered into the fuel tank and secured with the attached cord,

the nylon bladder absorbs any water in the tank until fully expanded in the mesh filter leaving the fuel oil, diesel or petrol in the tank

- Simply leave the soaker in the tank until the bladder is full of water, then remove and replace
- **We recommend the water soaker is checked and replaced every 3 months**

Flood Water Absorbent Boom

Oil Absorbent Boom

Chemical Absorbent Boom

APPLICATION

- Designed to protect properties from the threat of flood water

FEATURES & BENEFITS

- Strong tubular knitted outer fabric sleeve allows for durability, expansion and improved speed of absorption
- Filled with a super absorbent polymer that retains any liquids absorbed and keeps the boom in place and exposure to flood water increases stability
- The absorbent core is secured into the boom at each end with a stitched seam
- Allows flexibility to be positioned where required
- Can be overlapped for continual runs

APPLICATION

- Suitable for the recovery and containment of any lubricants and oil

FEATURES & BENEFITS

- Comprising of an outer plastic netting that contains a spunbond inner sock
- Absorbent core is manufactured from very fine meltblown fibres allowing more oil to penetrate deeper into the centre
- A tough nylon rope runs the entire length of the boom for additional strength
- Doubled stapled ends for increased strength
- Rust proof metal rings and snap hooks enable booms to be joined together to form long runs

APPLICATION

- Specifically designed for the recovery of chemical spillages

FEATURES & BENEFITS

- Excellent absorbency for a wide range of products including most acids, alkalis, oil and water-based liquids
- Absorbent fill contained within a strong nylon outer netting with a continuous high tensile draw cord for added strength and handling
- Hooks and rings at each end allow coupling together to form longer runs if required
- Suitable for creating a barrier in the event of a spill to prevent the spill from spreading

Super Absorbent Spill Strips

■ Flat

■ Inflated

APPLICATION

- Industry sectors include industrial MRO, cleaning, supermarkets, fleet management, health care, plumbing and heating

FEATURES & BENEFITS

- Extremely portable, ideal where an immediate response is required for dealing with spills
- Lay flat, super absorbent strip only expands when in contact with water or water based liquids
- Extremely low profile allows the product to access hard to reach restricted areas
- Distinctive, highly visible colour reduces the risks of slip and trip conditions
- Easy to use, simply tear at the perforations for economy of use
- Non-drip even when fully saturated
- Prevents damage due to leaks, spills and condensation in property
- Compact storage, supplied in a handy dispensing box
- Contents of box 25 x 1.2m long strips, minimum absorbency of box 75 litres

Chemical Spill Response

HSE recommendation on chemical spills

- Liquid spills involving hazardous materials should first be contained to prevent the spread of the material to other areas.
- Once the hazardous material has been contained the material should be neutralised to render it safe.
- Acids and alkalis should be treated with appropriate neutralising agents. Due to the differing properties of the various groups of chemical, an appropriate treatment strategy with suitable chemicals should be established in each case.
- Treated material should be absorbed onto inert carrier material to allow the material to be cleared up and removed to a safe place for disposal or further treatment as appropriate.
- Once the material has been treated the cleared up area should be washed with large volumes of water
- Vytac neutralisation products are recognised as an important element of spill response safety.
- Vytac's unique colour indicator systems allow for safe, easily visualised neutralisation
- Disposal costs can be reduced by converting hazardous waste into general waste

CHEMICAL NEUTRALISATION PROCEDURES

FOR SMALL CHEMICAL SPILLS

1. Identify appropriate neutralisation
2. The application should commence from the outside of the spill, working inwards as this reduces the risk of the responder contacting untreated material
3. Sprinkle neutraliser on chemical until desired colour change indicates complete neutralisation
4. The non hazardous compound can now be swept up and disposed of through the general waste system

Acid Vytac ACX

Alkali - Vytac CS

FOR CHEMICAL SPILLS UP TO 20 LITRES

1. Vacuum the spilled chemicals using a chemical wet vacuum
2. Dispense the aggressive chemical into a container for treatment
3. Dilute the chemical to the required dilution to prevent heat build up
4. Add the appropriate Vytac neutraliser until the colour change indicator shows neutralisation is complete
5. Dispose of the neutralised non hazardous chemical through general waste system.

ACID NEUTRALISATION

On adding Vytac ACX to an acid, the pale pink/orange colour will gradually change. Continue to add and mix Vytac ACX until the colour is permanently red indicating a neutral solution.

SODIUM HYDROXIDE NEUTRALISATION

On adding Vytac CS to an alkali, the purple colour will gradually change. Continue to add and mix Vytac CS until the colour is permanently dark yellow.

FOR CHEMICAL SPILLS GREATER THAN 20 LITRES

- Call Spill Response Team
- Spill Training for chemical spills accredited by British Safety Industry Federation is available for operatives handling chemicals.

Chemical Spill Neutralisation Products

APPLICATION

VYTAC

A DIVISION OF CARTIER CHEMICALS

- Vytac ACX Acid Neutraliser quickly and effectively neutralises acid spills.
- Vytac CS Alkali Neutraliser neutralises liquid caustic spills.
- Vytac JCN Bleach Neutraliser is a neutraliser for sodium hypochlorite.
- Vytac FAS and FNC2 Formaldehyde Neutralisers quickly and efficiently absorb the vapours and immobilise formaldehyde spills.
- Vytac MVS and MIS Mercury Neutralisers quickly and efficiently absorb the vapours and immobilise mercury spills.

Wet & Dry Chemical Vacuum Cleaner

APPLICATION

- Designed to address the needs of specialist operations requiring a continuous collection and discharge of bulk liquid such as salvage work, liquids spills and flood damage

FEATURES & BENEFITS

- Structofoam construction
- Single Twinflo power head float valve and trash basket inlet filter system
- Fully automatic submersible pump unit with its own Hi/Lo level float control allows continuous suction and discharge operation
- 10m discharge hose to assist with the water disposal
- Capacity wet 32 litres
- Cleaning range 26.8 metres
- Weight 25kgs
- Complete with accessory kit
- **Aggressive chemicals must be neutralised first before attempting to vacuum**

Oil Absorbent Boom

APPLICATION

- Designed to capture floating oil at sea, in harbours, lakes and canals and prevent it contaminating the surrounding shoreline

FEATURES & BENEFITS

- Constructed from Ultra-X-Tex fabric
- Allows water to pass through freely while filtering any oil present on the waters surface
- Booms can be connected with 300mm overlap to ensure maximum containment and coverage
- Float on the surface of the water via an internal closed cell foam float
- Boom is contained in a chemical resistant mesh netting
- Ultra Microbes can be added to provide a bio-remediation element if required

Code	Dimensions Length x Dia mm	Containment Capacity Litres	Weight kgs

Oil Absorbent Skirted Boom

APPLICATION

- Designed to capture floating and submerged oil at sea, in harbours, lakes and canals and prevent contamination of the surrounding shoreline

FEATURES & BENEFITS

- Constructed from Ultra-X-Tex fabric
- Allows water to pass through freely while filtering any oil present
- 850mm deep weighted skirt hangs below the boom capturing any oil that is under the water but close to the surface
- Additional 1524mm skirt can be quickly added for deeper water protection
- Multiple booms can be connected for long, continuous runs and easy deployment and retrieval
- Floats on the surface of the water with a 150mm dia closed cell foam float
- Ultra Microbes can be added to provide a bio-remediation element if required

Code	Description	Dimensions Length x Depth mm	Containment Capacity Litres	Weight kgs

Oil Absorbent Spill Fence

APPLICATION

- Designed to protect shorelines, riverbeds and environmentally sensitive areas from oil spills

FEATURES & BENEFITS

- Manufactured from Ultra-X-Tex material to allow tidal water to flow through the fabric while absorbing any oil
- Wire backing provides additional support and strength to the tidal push back and forth
- Captures oil on the surface of the water and in addition sub-surface oil

Code	Dimensions Length x Depth mm	Containment Capacity Litres	Weight kgs

NEW**MADE IN THE UK**

Flood Water Protection

Flood Water Barriers

APPLICATION

- Provides temporary or long term protection to commercial and domestic property from invasive flood water

FEATURES & BENEFITS

- Once inflated, forms a resilient, leak-proof, water tight barrier against most surfaces
- Manufactured from 50% reclaimed materials
- Non toxic and non hazardous
- Allows great flexibility as can be positioned where required very quickly
- Easy to store and roll out in an emergency
- Ideal for use across doorways, gates to property or to divert flood water away from property
- Available in a display box and poly wrap versions

osmo

Code	Description	Dimensions L x W mm	Absorbency capacity litres

FL-151-150UB	Flood Water Barrier Poly Wrap	1500 x 210	15
FL-151-152	Flood Water Barrier Boxed	3000 x 210	30
FL-151-152UB	Flood Water Barrier Poly Wrap	3000 x 210	30

FloodSax

APPLICATION

- Creates a barrier to the threat of flood water entering properties, ideal for commercial and domestic properties

FEATURES & BENEFITS

- Fully activated in under 3 minutes to form a defence barrier
- Can be activated using a bath, sink, bucket, hosepipe or even using the floodwater itself
- A semi-porous inner liner within the FloodSax contains a special gelling polymer which absorbs up to 20kgs of water
- They are designed to mould into doorways and form a defensive wall to keep floodwater out
- Dimensions when activated length x width x height 500mm x 450mm x 200mm

Code Description

FLOODSAX

FL-151-140	FloodSax Pack of 5
FL-151-141	FloodSax Box of 20

Flood Water Barrier

APPLICATION

- Designed to protect both domestic and commercial properties from the threat of flood water

FEATURES & BENEFITS

- Strong tubular knitted outer fabric sleeve allows for durability, expansion and improved speed of absorption
- Filled with a super absorbent polymer that retains any liquids absorbed and keeps the boom in place and exposure to flood water increases stability
- Allows flexibility to be positioned where required
- Can be overlapped for continual runs
- Dimensions 3000 x 120mm
- Absorbency capacity per boom 5 litres

Roof Drip Diverters Pipe Drip Diverters

■ UL-34-126

■ UL-34-125

■ UL-34-124

APPLICATION

- Collects water from leaks in roofs and diverts it away to a drainage point avoiding damage to equipment and property

FEATURES & BENEFITS

- Manufactured from lightweight vinyl coated fabric
- Heavy-duty grommets in each corner
- Simple and quick installation, ideal for use in an emergency
- Avoids fluid on the floor and eliminates possible slip hazards
- Kit includes drip diverter, drainage hose and rubber strap kit. Supplied in a clip handle heavy duty PVC carry bag

Pipe Drip Diverter

APPLICATION

- Channels water from damaged pipework away from personnel and machinery reducing the risk of potential slip hazards

FEATURES & BENEFITS

- Large 457mm diameter opening captures any overhead water leaks
- Rugged, coated vinyl fabric construction
- Bottom fitting connects to a drainage hose product code UL-34-126 (not supplied) and allows the water to be collected in a drum or tank
- Supplied complete with bungee cord straps and hooks for quick installation
- Weight 1kg

Code	Description	Dimensions L x W mm	Weight kgs

Spill Care Commercial & Domestic

Thirsty Sock

APPLICATION

- Designed to capture water based liquid spills only from leaking pipework, radiators, washing machines, toilets, vending machines, fridges and freezers and general liquid spills

FEATURES & BENEFITS

- Quick and easy to deploy, ideal for use in tight spaces where it may not be possible to fit a bucket or container to contain the spill
- Any liquid spill collected is turned to gel avoiding drips or cross contamination
- Surfaces are left clean and dry preventing further damage and preventing a slip hazard
- Manufactured from a minimum of 50% reclaimed materials
- Non toxic and non hazardous
- Dimensions length x width 1000 x 120mm
- Absorbency capacity per sock 3 litres
- Pack of 3 pads
- Available in a display box

Code	Description

Mega Thirsty Pad

APPLICATION

- Designed to capture large water based liquid spills only from leaking pipework, radiators, washing machines, toilets and ceilings in public places

FEATURES & BENEFITS

- Quick and easy to deploy, ideal for use in tight spaces where it may not be possible to fit a bucket or container to contain the spill
- Any liquid spill collected is turned to gel avoiding drips or cross contamination
- Surfaces are left clean and dry preventing further damage and preventing a slip hazard
- Manufactured from a minimum of 50% reclaimed materials
- Non toxic and non hazardous
- Dimensions length x width 370 x 365mm
- Absorbency capacity per pad 4 litres
- Pack of 5 pads
- Available in a display box and poly wrap versions

Plumbers Pads

APPLICATION

- Designed to protect carpets and flooring from overhead water based leaks and minor plumbing issues

FEATURES & BENEFITS

- Can be left in location to absorb leaks, no need for repeated mopping
- Easy to position
- Surfaces are quickly made safe from slip hazards
- Avoids lasting damage to flooring
- Manufactured from a minimum of 50% reclaimed materials
- Non toxic and non hazardous
- Dimensions length x width 270 x 370mm
- Absorbency capacity per pad 2 litre
- Pack of 5 pads
- Available in a display box and poly wrap versions

THE
SPILL TRAINING
ACADEMY

Training Education & Legislation

The Spill Training Academy provide BSIF and UK Spill accredited courses presented by skilled, professional trainers with current, close experience in spill control with the object of enhancing the awareness and skills of operatives.

Courses provide an awareness of the risks and threats and how to deal with any emergencies.

Courses can be held at the clients location or at our dedicated training facility in Leicestershire.

Online 1st Responder and Spill Awareness Course

The Spill Training Academy is able to provide an online version of the BSIF and UK Spill accredited 1st Responder and Spill Awareness Course. This is conducted over 4 x 45 minute sessions and covers the complete curriculum. On completion of a final test the delegate is awarded full accreditation. All learning materials are delivered direct to the delegate prior to the course commencing.

Please contact us for further details at www.thespilltrainingacademy.com

Legislation

Protecting the environment and our planet -

Governments introduce legislation to protect the environment from pollution and to safeguard our health. All companies are responsible for ensuring that oil storage facilities and liquid controls comply with these regulations. There are strict penalties for non-compliance.

The Control of Pollution Oil Storage Regulations

Pollution of a watercourse, groundwater or the sea (controlled waters) by oil is a common type of water pollution incident dealt with by the environment agencies. Many such incidents are caused by leaks and spills from storage facilities, small containers, drums, IBCs or storage tanks.

Each country within the UK has its own legislation governing oil storage, as follows:

- The Control of Pollution (Oil Storage) England Regulations 2001.
- The Water Resources (Control of Pollution) (Oil Storage) Wales Regulations 2016.
- The Control of Pollution (Oil Storage) Northern Ireland Regulations 2010.
- Water Environment (Controlled Activities) Scotland Regulations 2011 (as amended).

Collectively these regulations are known as the Oil Storage Regulations or OSR (detailed information can be found on our web site www.fosseliquitrol.com)

In brief these regulations ensure that all employers must:

- Ensure that oil stored on their premises does not pollute the water environment including groundwater
- Ensure that oil storage facilities comply with the standards of the oil storage regulations.
- Any discharges to surface or ground water must comply with the requirements of the environmental permitting regime in England and Wales, or Controlled Activities Regulations (CAR) in Scotland. In N. Ireland, the discharge of any waste to surface or ground water is controlled through consents.

Pollution of any inland surface water and ground waters by oil is an offence

The OSRs for England, Wales and Scotland (above) apply to anyone storing oil in containers of

- more than 200 litres, above ground at an industrial, commercial or institutional site, or

- more than 3500 litres at a domestic site (2500 litres in Scotland).
- For England this covers new oil stored outside but not waste oil, for Scotland, Wales and N Ireland new and waste oil is covered, stored both inside and outside.

In Wales, any person (including domestic) storing more than 200 litres is included under the regulations. In the case of domestic properties, oil containers installed before 15 March 2016 are exempt. Farms which store oil in Wales are also now covered by the OSR. In Scotland, farms are also covered by the regulations. In England and Northern Ireland, there are separate requirements for storing agricultural fuel oil.

- Storage includes drums and mobile bowsers.
- The regulations cover businesses and public sector buildings in the United Kingdom. The regulations for Scotland and Northern Ireland differ slightly from those in England and Wales.

Requirements of the Regulations

Companies should ensure that their oil storage facilities meet the following requirements:

- Tanks, drums or other containers must be strong enough to hold the oil without leaking or bursting.
- If possible, the oil container and associated pipe work must be positioned away from any vehicle traffic to avoid damage from collision.
- Valves and taps should be lockable and locked when not in use.
- A bund (secondary containment) must be provided to catch any oil leaking from the container or its ancillary pipe work and equipment.
- The bund must be sufficient to contain 110% of the maximum contents of the oil container.
- A drip tray must be able to hold one quarter of the total capacity of the drums it can hold.
- Where more than one container is stored, the bund should be capable of storing 110% of the largest tank or 25% of the total storage capacity, whichever is the greater. Bowsers that are not banded will need to be kept in a banded area of 110% capacity when in use.
- The bund base and walls must be impermeable to water and oil, and checked regularly for leaks.
- Valves, filters, sight gauges, vent pipes or other ancillary equipment must be kept within the bund when not in use.

- Drainage valves must not be fitted to the base or side of the bund for the purpose of draining out rainwater.
- Fixed tanks must be fitted with an automatic overflow prevention device if the filling operation is controlled from a place where the tank or vent cannot be seen.
- Where oil from the tank is delivered through a flexible pipe that is permanently attached to the container, the pipe must be fitted with a tap or valve at the delivery end which closes automatically when not in use.
- If a pump is used it must be fitted with a non-return valve in its feed line and positioned so as to minimise any risk of damage by impact and protected from unauthorised use.
- If a permanent vent pipe, tap or valve through which oil can be discharged from the tank to the open is fitted, it must be situated within the secondary containment system and arranged so as to discharge the oil vertically downwards and be contained within the system.

Enforcement of the Oil Storage Regulations

The Environment Agency is responsible for enforcing the regulations throughout England. In Scotland, Wales, and Northern Ireland, enforcement is by the respective environmental agencies: Scottish Environment Protection Agency (SEPA), Natural Resources Wales, and the N. Ireland Environment Agency respectively.

Acts of Legislation

Water Resources Act 1991 - The main Water Pollution offence is Section 85 of the WRA. Basic outline Introduced the concept of “**The Polluter Pays Principle**” – In short, whoever owns the liquid is responsible for what happens to it. This is a strict liability offence; intention or negligence by the defendant is not required for the offence to be committed

Water Industries Act 1991- It is an offence under this act to pollute or potentially pollute any water in any waterworks which is likely to be used for human consumption.

Protection of Groundwater Regulations 1998 - these add to the consent regulations introduced in 1991 and provide a consolidated system of environmental permitting and the latest versions are the Environmental Permitting (England and Wales) Regulations 2010 and

associated amendments, which introduced a single ‘environmental permitting’ system in England and Wales.

The Waste (England & Wales) Regulations 2011

- this act exists to ensure responsibility is taken by the producers of waste for managing their waste and avoiding harm to human health or environment.

The act aims to reduce or eradicate harmful acts of waste crime such as fly tipping. It covers disposal of material such as used sorbents, and the paper trail that shows waste has been disposed of legally.

Dangerous Substances and Explosive Atmospheres Regulations 2002

- is the UKs implementation of the European Union-wide ATEX Directive. The intention of the Regulation is to reduce the risk of serious injury resulting from a “dangerous substance” igniting and potentially exploding by use of non-compliant electrics.

The Control of Major Accident Hazards (COMAH)

Regulations 2015 - major industrial accidents involving dangerous substances pose a significant threat to humans and the environment, such accidents can give rise to serious injury to people or serious damage to the environment, both on and off the site of the accident.

The purpose of the Regulations is to lay down rules for the prevention of major accidents involving dangerous substances, and to seek to limit as far as possible the consequence of such accidents.

Pollution Prevention Guidelines - these documents: PPG2 Above Ground Storage Tanks; PPG21 Pollution Incident Response Planning; PPG22 Dealing with Spills; PPG 26 Storage & Handling Of Drums & IBCs were produced and supported by the Environment Agency. They provided authoritative guidance on best practise application of pollution prevention to specific applications and industries. They were withdrawn by the EA in 2015 due to lack of funding, with nothing suggested to replace them.

The British Safety Industry Federation (BSIF) are currently revising these documents and they will be published as the Environmental Safeguarding Advice (ESA's).

If you have concerns that your existing facilities or operating procedures are inadequate, please contact your local distributor to arrange a meeting with one of our experienced spill control specialists.

COURSE:

BSIF Accredited 1st Responder Spill Awareness and Response Course

Online 1st Responder and Spill Awareness Course

The Spill Training Academy is able to provide an online version of the BSIF and UK Spill accredited 1st Responder and Spill Awareness Course. This is conducted over 4 x 45 minute sessions and covers the complete curriculum. On completion of a final test the delegate is awarded full accreditation. All learning materials are delivered direct to the delegate prior to the course commencing.

Please contact us for further details at www.thespilltrainingacademy.com

Features

- Develop an awareness of the risks and threats associated with liquid spills
- Understanding of the safe and effective use of spill control resources
- Simulated emergency spill situation
- Containment techniques and evaluation of best practice

Benefits

- Improvement in operative training and spill awareness
- Reducing environmental incidents on site
- Compliance with environmental legislation
- Delegates gain BSIF accreditation in spill control and awareness

Course Content

A Spill Awareness video presentation to introduce the subject, covering relevant environmental issues with spills, reasons for spill control, legislation, procedures and emergency response action plans.

Coverage of the products available for storage, handling and dispensing of liquids as well as sorbent products for containing and dealing with spills and personal safety issues.

Detailed discussion of the principles of Best Practice with liquid storage, drain protection, legislation covering storage and handling of liquids including the penalties associated with breaches.

Demonstration of relevant products including sorbents to British Standards, emergency spill kits and ready use dispensing stations.

Simulated Spill exercise conducted in a suitable outside location

Final Test covering all aspects raised in the course

Summary and Final Discussion

Duration: Half Day

Location: At client's location of choice or the Spill Training Academy, Leicestershire

Group Size: Max 12

Validity: 3 Years

COURSE:

Train The Trainer Spill Awareness and Response Course

Features

- As the BSIF Accredited 1st Responder Course
- Enables the Trainer to train their team members in the basics of spill awareness and response, based on the BSIF Accredited 1st Responder Course.
- Gives experienced managers and supervisors the fundamental tools to train their staff in oil and chemical spill awareness, prevention and response
- Post qualification support available through website and telephone hotline.

Benefits

- As the BSIF Accredited 1st Responder Course
- An effective method of training operators in companies with large staff numbers, high staff turnover and seasonal agency workers
- Cost efficient
- Course delegates gain BSIF Accreditation in spill control, awareness and response

Course Content

As the BSIF Accredited 1st Responder Course

The Principles of Training and delivering a Training Event

Detailed Review of all aspects of the BSIF Course

Explanation of the Course notes, presentation materials and equipment packs

Communication exercises – to emphasise the importance of clear and concise communication

Examine why operatives / staff need training in spill awareness and response

Role play – delegates will be encouraged and guided to talk about the different aspects of the 1st Responder Course

Test Presentation – each delegate will be guided to give their own presentation on the subject

Final Summary

Training Material

- Spill Training video presentation
- Course Manual and Information Pack for the trainer and any subsequent trainees
- Table Top Sorbent Demonstration Kit
- Sorbent Presentation samples
- One Complete Outdoor Simulated Spill Kit
- Post Course Technical Helpline

Duration: One Day

Location: At client's location of choice or the Spill Training Academy, Leicestershire

Group Size: Min 6 - Max 12

Validity: 3 Years

COURSE: Marine Oil Spill Response Training Courses

OPRC, the International Convention on Oil Pollution Preparedness, Response and Cooperation, 1990, required the development of a comprehensive training programme in the field of oil pollution preparedness and response. In this regard training courses were developed by the International Maritime Organisation (IMO) and, in the UK, accredited by the Nautical Institute on behalf of the Maritime and Coastguard Agency. Courses are all delivered by Gorton Consultancy Ltd who are our contract providers and hold the Nautical Institute's Accreditation.

Oil Spill Response Course IMO Level 0

Target Group

- This course is intended to provide a general introduction and awareness to all those involved in marine, port and offshore operations that may lead to a release of pollutants.

Objectives

- This course provides a general introduction and awareness to oil spills in the marine and shoreline environment. It addresses the preparedness and response options available to an oil pollution incident in the context of the current best practices and thinking in the response to an oil spill.

Course Content

- Introduction to oil spills
- Fate and behaviour of oil in the marine and shoreline environment
- Impact of oil spills
- The work of IMO
- International land national legislation
- Oil spill response preparedness
- Understanding and assessing risk

Duration: 1 Day

Location: At client's location of choice or the Spill Training Academy, Leicestershire

Group Size: Max 12

Validity: 3 Years

Pre-course requirement

This course assumes that the participants have no experience in oil spill response or oil spill response preparedness but need an awareness of these subjects.

COURSE: IMO Oil Spill Response Train The Trainer Course

Oil Spill Response Course IMO Level 1

Target Group

- Designed for all personnel who may be called upon to act as an oil spill first responder and to participate in an oil spill response clean up.

Objectives

- Delegates will gain an understanding of the weathering process of oil in the marine environment, be able to implement an efficient shoreline clean-up utilising different response techniques, selecting appropriate equipment and managing spill response teams on-site

Course Content

- Site and Risk Assessments
- Health and Safety aspects
- Selecting and implementing clean-up strategies
- Environmental issue in spill response
- Waste disposal
- Managing spill response teams
- Record keeping
- Practical exercises and demonstrations
- Theoretical exercises

Duration: 4 Days

Location: At client's location of choice or the Spill Training Academy, Leicestershire

Group Size: Max 12

Validity: 3 Years

Pre-course requirement

It would be an advantage for delegates to have some knowledge or prior study of oil spill response issues and techniques

COURSE: Oil Spill Response Course IMO Level 2 & 3

Oil Spill Response Course IMO Level 2

Target Group

- Designed for all managers/supervisors who will lead or supervise oil spill response teams and those with support responsibilities within an incident command or emergency team.

Objectives

- Delegates will gain an understanding of the safe and efficient response to oil spills, be able to undertake initial assessments of spill risk, initiate a suitable response, identify priorities for protection, chose the correct response options, identify the limitations of response options and equipment and understand the needs of the media.

Course Content

- Causes and fate of oil spills
- Environmental issues
- Contingency planning and Health and Safety aspects
- Oil Spill management and response

- Use of detergents
- Containment recovery and protection
- Shoreline clean-up
- Waste handling and disposal
- Terminating response
- Post response operations
- Media handling
- Practical exercises and demonstrations
- Theoretical exercises

Duration: 4 Days

Location: At client's location of choice or the Spill Training Academy, Leicestershire

Group Size: Max 12

Validity: 3 Years

Pre-course requirement: Whilst not compulsory, participants are encouraged to take the IMO Level 1 course before attending.

Oil Spill Response Course IMO Level 3

Target Group

- Designed for all senior managers and officials who may be involved in planning for or managing the response to an oil spill.

Objectives

- Delegates will gain an understanding of the complexities of oil spill management and consider the political and media pressures, the legal and financial implications, the issues of public and response personnel safety and the post operational requirements.

Course Content

- Effective response organisations
- Causes, fate and consequences of oil spills
- Roles of Government and other key stakeholders
- Legal frameworks and international conventions
- Liability for claims and compensations

- Risk Assessment and contingency planning
- The Incident Controller
- Response Options
- Operational limitations of response strategies
- Resource requirements
- Terminating a response
- Media awareness
- Theoretical exercises

Duration: 4 Days

Location: At client's location of choice or the Spill Training Academy, Leicestershire

Group Size: Max 12

Validity: 3 Years

Pre-course requirement: Whilst not compulsory, participants are encouraged to take the IMO Level 2 course before attending.

COURSE:

Marine Oil Spill Response Train The Trainer Course

Target Group

- This course is designed as an introduction to training for those with a technical understanding of oil spill response, but who need tuition in instructional techniques including the formal development and delivery of IMO – OSR Training Courses.

Objectives

- The programme is based on tested training principles. Participants are videotaped and given timely and constructive feedback on their work. By the end of this course participants will have the skills to design a training programme, highlight the key objectives of the sessions, organise the logistics of a training session, deliver the training to desired objectives, coach individuals and groups and be able to evaluate the training effectiveness

Course Benefits

- By the end of this course delegates will be able to:
- Be an accredited in-house trainer
- Structure their training to deliver stated objectives
- Project credibility in their delivery
- Deliver training in an interesting and informative manner
- Deal with difficult situations or individuals
- Be able to evaluate the effectiveness of the training
- Course manual and Information pack for Trainer and any subsequent trainee
- Post-Course Technical Helpline

Course Content

- The principles of learning & motivation
- Stages of learning & learning styles
- Training aims and objectives
- Structuring training
- Running training effectively
- Delivery skills
- Assessment techniques
- Practical exercises
- Theoretical exercises

Duration: 2 Days

Location: At client's location of choice or the Spill Training Academy, Leicestershire

Group Size: Min 6 -Max 12

Validity: 3 Years

Pre-course requirement

Participants must have completed, and be fully conversant with the relevant IMO Model Course for which they require development as a trainer.

Spill Risk Assessment

Responsibility for the correct handling and storage of liquids lies with the owner organisation (including protection from wilful acts of vandalism). The pollution of both land and water is regulated against by law and whether accidental or deliberate, can result in prosecution leading to fines and other related costs both tangible and intangible (i.e. damage or harm to both image and reputation).

The Environment Agency's policy is to vigorously pursue prosecution of both company and individuals responsible for any infringements of these regulations.

We are able to assist you in identifying your needs and requirements and in finding solutions to your spillage problems with the following service.

A spill risk assessment of your company's current status to deal with a significant spill. The assessments key aims are to:

- Review all aspects of spillage response on site including liquid types and quantities
- Review how liquids are handled and stored, particularly the condition and suitability of secondary containment systems or fixed bunds
- Identify potential routes for the escape of liquids from site
- Identify potential spill hazards and sensitive areas
- Audit current spillage response products and equipment
- Identify any shortcomings or non-compliance with statutory regulations/legislation
- Provide a comprehensive report incorporating images, recommendations for proposed additions and improvements.
- Address specific training needs

This report can help provide the basis for an Environmental Management Spill Contingency Plan and can be used towards your ISO 14001 compliance to improve upon your site's current level of spill awareness and response.

Please contact your local distributor to arrange a site visit by one of our experienced spill control specialists.

Ethylene Dichloride	N
Heptane	Y
Methyl Alcohol 100%	Y
Methyl Ethyl Ketone	S
Nitrobenzene	S
Petroleum	Y
Phenol 90%	N
Toluene	S
Trichloroethylene	N

GASES	KEY
Carbon Dioxide	Y
Carbon Monoxide	Y
Hydrogen Sulphide	Y

KEY:

- Y** = Product should be suitable for prolonged or repeated contact with these substances under specified conditions.
- S** = Products may be suitable for short term storage however, some deterioration in properties may occur. It is recommended that the user should perform qualification tests before and during use of the container.
- N** = Substances aggressively attack the product or have vapour pressures incompatible with containers.

This information is provided as a guide only. No claims or warranties are expressed or implied as to the absolute accuracy of the data supplied. In all cases it is assumed chemicals in question are at ambient temperatures and pressure and are used in basic state, not in combination or mixtures. Small test sampling by users is always recommended to ensure safe application.
