WHAT IS THE 'CORE BROCHURE'?

Here at Hazchem Safety, our mission is to provide protection for workers in Hazardous Environments. We understand that you need the right gear, at the right price, at the right time. To make it simple for you, we have produced this core brochure to highlight some of the many stock lines that we hold for rapid despatch to your workplace.

Whilst we can offer you access to a wider range of brands of PPE and technical workwear; this brochure encapsulates the most popular lines. Please take a moment to browse through it, and then contact us by utilising one of the following methods:-

- Phone us on **01280 841400** for a personal response.
- Email us at sales@hazchemsafety.com
- Log on to our website and use the Lynx online ordering process

Just as a reminder, we are a main distributor for many of the major brands of PPE- 3M, Ansell, MSA and many others, as well as being a Manufacturer and major stockist of flame retardant and anti-static workwear, with our own in-house garment technologist.

It's all about keeping you safe in hazardous environments.

ORKA® ECO

AS2023

ORKA® MAGNUS ECO
FR AS ARC COVERALL

Sizes: 36" - 58" Chest, 33"/85cm Leg
Colour: Orange, Navy

The ORKA ECO range is the first ever treated FR fabric, with 50% sustainable green fibres.

EN ISO
11612

EN 1149 - 5:
2018

IEC 61482-2:
2018

We know it's important to make sustainable choices with our PPE at every level to ensure sustaining positive change.

Fabric

The ORKA ECO sustainable coverall is a result of extensive research and development and is crafted from a unique blend of fire-resistant (FR) treated fabric, cotton, eco fibres, and recycled PET, with **50%** of the fabric being **sustainable green fibres**.

TENCEL Lyocell and Modal fibres help to maintain the environment balance by being integrated into nature's cycle. The fibres originate from the renewable raw material wood, created by photosynthesis.

Carbon Saving

This industry-first innovation offers a carbon footprint saving of **3.7kg CO₂e** per coverall*

Water Saving

The coveralls result in a reduction of over **55 litres** of water consumption per unit.

Number of PET Bottles

12 PET bottles recycled into every coverall**

*Compared to the average size of standard FR treated cotton

**Average - varied by size

GARMENT RECYCLING

in partnership with Avena

Sustainability

- **Zero** to landfill
- **13.5kg** of CO₂ saved for every 1kg of textiles recycled by Avena
- **1kg** of textiles through Avena saves **1000 litres** of water
- Helps achieve and maintain **ISO 14001** certification

Security

- Garments are destroyed beyond recognition
- Certificate of destruction provided after each collection
- Staff vetted to BS 7858 standards
- Compliance with BS EN 15713-2009 code of practice
- Accredited with ISO 9001

HOW IT WORKS

Happy Recycling!

Achieve your sustainability goals!

Hazchem Safety x Wise Safety

Wise is now officially part of the Hazchem Safety Group.

This partnership combines over 80 years of experience in the safety industry, bringing together our shared commitment to innovation, quality, and exceptional service—ensuring that our customers receive the best solutions in the industry.

This has opened a new Northwest location to us at Hazchem in Ellesmere Port, UK. This presents an exciting opportunity, enabling us to serve the Pharmaceutical and Chemical industries by leveraging Wise's proven expertise in these markets.

What this means for you:

- Same contact details – Keep reaching out as you always have.
- Account Manager updates – Max Haughton (and the team) will be in touch.
- New Innovation – Exciting developments on a new online ordering portal coming soon!

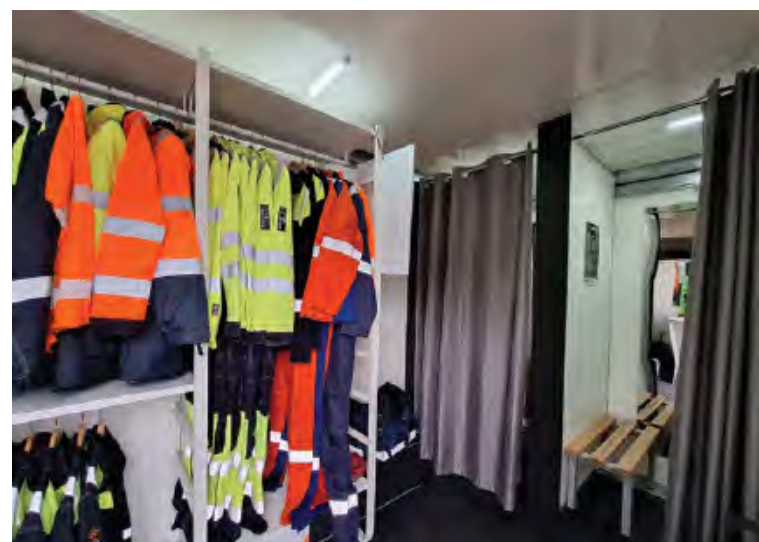

KIT OUT YOUR TEAM WITH THE PERFECT FIT

With an onsite sizing visit

Never leaving anything to chance, we offer an onsite sizing service to allow your staff to try on garments for size and be measured in private, to ensure they choose the perfect fit.

Our colleagues will visit your site to help your staff select their perfect fit in Coveralls, Jacket or Trousers, in a private environment, allowing for accurate measuring and advice.

See below the newest Hazchem Innovation: The Showroom and Sizing Van. At Hazchem, we care about everyone having correct fitting PPE so this solution is to help kit out your staff with all the correct sizes as swiftly as possible. We will work with you to arrange the best time and date for us to attend in the sizing van, so please call **01280 841400** or email sizing@hazchemsafety.com to book your visit.

WOMEN'S FR

DESIGNED FOR WOMEN, BY WOMEN

The HAZTEC® Brand

HAZTEC® is a brand of Hazchem Safety Ltd and offers a comprehensive range of Inherent Flame Resistant, Antistatic and ARC flash garments. Wearers of HAZTEC® Workwear include Fuel & Gas Distribution, Petrochemical and Utility Contractors where FR & ARC flash protection is required.

Correctly Fitted Garments

There are more women working in Industry than ever before, highlighting a need for more women's flame resistant workwear designed specifically to address their differing body shapes. Historically, unisex garments have been provided to women, which can compromise the safety of the wearer as elements such as arm and leg length are not tailored for the female form and can cause workplace accidents.

The Womens Workwear range will continue to develop

Having an in-house garment technologist ensures that we have 100% control over the garment design to ensure every wearer-centred detail comes to fruition when manufactured. It also means we can develop the garments more frequently to adapt the designs according to wearer feedback.

All stated sizes are for guide purposes only. We always recommend trying on your new Workwear to ensure you choose the optimum size, and also refer to the User Information Sheet included with each protective wear garment to check for any specific requirements. Our Women's Size Chart is currently under going some updates. If you'd like more information on sizing, please contact sales@hazchemsafety.com.

- Core Sizes we have patterns for in most products although this can vary by product so please check the size range against each specific product. Surcharges may also apply on Outsizes.
- For sizes 5XL/6XL or 56" and above, add 20%. For bespoke sizes (outside this Core Size range) add 50% to the standard price unless agreed otherwise. This includes MTO (made to order garments).
- Note: Not all trouser and coverall models are available in Short Length. Please ask a member of our team if you need more information.

YOU ASK, WE ANSWER

What is the difference between lined and unlined green gauntlet gloves?

'Lined' gloves have a soft flocked-cotton lining to the inside of the gauntlet giving warmth and feeling softer to the skin. The 'unlined' gloves do actually have a smooth interlocked liner with the benefit of not shedding any cotton 'fluff' and being less prone to holding any dirt. Both styles are treated with acti-fresh, reducing bacterial build-up and odours. Use whichever you find most comfortable!

What PPE and Equipment is required to get into a Fuel Terminal?

The PPE required to collect fuel from any UK terminal is: -

- Flame Retardant/Anti-static Clothing that meets Hi visibility standard EN20471 Class 3. Cover Torso and upper and lower limbs
- Inner clothing shall be made of non-combustible or natural fibres
- Safety Helmet with integral eyewear and hearing protection
- Gloves to be worn to give protection for any product that is handled
- Safety Footwear to meet 200 joule toecap protection and anti-static and slip resistant soles

Brent Douglass
Managing Director

Have a question for the Hazchem Expert Team?

Email us at sales@hazchemsafety.com

What does FR, AS and ATEX mean?

The terms which are often used to describe Oil Terminal specification workwear are FR/ AS and the word Atex is sometimes used. The term means flame retardant and antistatic, which is the minimum recommended level of protection for use in a flammable or explosive environment. The flame retardancy of the garment means that the fabric does not burn or melt in a flashfire and the anti-static properties mean that static electricity will not build up and cause an ignition. Atex standards do not refer to clothing but electrical equipment which is manufactured in such a way that a spark is not produced when the product is switched on or used.

Development Manager

What is the quickest delivery time Hazchem can give me if I have a new starter?

There is nothing worse for Hazchem's customers than having a new driver start, but with no PPE for him or her to go out driving. If you need your PPE urgently for a new starter, please just email us on sales@hazchemsafety.com or call us on 01280 841400 and our team can prioritise your order for shipping same day or next day.

Marlon Douglass
Sales Manager

What is anti-static footwear?

Anti-static footwear should be worn in areas where build up of static electricity could be dangerous. It works by dissipating any static charge, safely 'earthing' it through the sole unit via semi-conductive materials. Footwear certified as ESD is best as it has an electrical resistance of less than 35 Ohms, meaning electrical charges cannot build up and so removing the likelihood of a static spark.

TREATED VS INHERENT

HAZTEC®
Hazard Protection

SAVES YOU MONEY

THE STORY OF BRIAN & RICHARD

**Treated
Coverall
£56.29**

Brian buys a **Treated Coverall** at **£56.29**. He washes it twice a week and after 25 weeks, it needs replacing.

COST OVER 3 YEARS

£337.62

Over 3 years, Brian needs **6 Treated Coveralls** at a cost of **£337.62**.

Lighterweight fabrics for the same protection

**Inherent
Coverall
£146.50**

Richard buys a **HAZTEC Inherent Coverall** at **£146.50**. He also washes it twice a week but doesn't need to replace it for 78 weeks.

COST OVER 3 YEARS

£293.00

Over 3 years, Richard needs just **2 HAZTEC Inherent Coveralls** at a cost of **£293.00**.

HAZCHEM®
Safety You Can Trust

INCLUDING...

The guarantee of always being protected throughout the life of the garment!

Hazchem Safety Our Story

1978

New **ADR** legislation was introduced, inspiring founder John Piddington to establish Hazchem with a clear vision: **Keeping workers safe on the road.**

2004

Following a change in management direction, Hazchem expanded its product range to include a broader selection of **PPE, Workwear, and Safety Signage.**

2008

The **HAZTEC®** brand was launched, with Hazchem securing manufacturing capability to deliver more comfortable **inherent FR fabrics.**

2014

As customer operations grew in size and complexity, Hazchem developed **Lynx Order Management**, a bespoke system delivering tailored, easy-to-use **online ordering.**

2018-19

With an expanding range of **HAZTEC®** garments, ADR signage, and kits, Hazchem became a **key supplier** to the **petrochemical and hazardous transport industries.** During this period, Hazchem and **Donside Safety** merged, expanding the business into the **Offshore & Marine industry.**

2020-21

Hazchem played a vital role in **supplying PPE** to **frontline workers** during a period of unprecedented demand.

2022

Driven by a culture of **innovation** and a commitment to **customer needs**, Hazchem continued to evolve—never settling for **“good enough.”**

2023

Hazchem relocated to a **new Distribution Centre** in Buckingham, England, **tripling warehouse capacity** and launching **Sizing & Showroom Van** innovation.

2024

Hazchem continued to protect workers in **hazardous environments**, with a strong focus on **Flame Resistant workwear**, including the expansion of **women's fit ranges.** The new **Hazchem website** also launched.

2025

Hazchem completed the acquisition of **Wise Safety**, strengthening its position in the chemical sector and expanding its capabilities through an **integrated stores management solution.**

2026 -

Hazchem Safety continues to strengthen its position as the **supplier of choice** for customers working in **hazardous environments.**

HAZCHEM SAFETY SUSTAINABILITY

Hazchem is committed to a more **sustainable future**, achieving **EcoVadis Bronze Supplier** recognition and introducing **100% recycled and recyclable packaging**, alongside the launch of the **ORKA® Eco FR ASARC Coverall.** The business continues to work towards achieving **Net Zero by 2030.**
