

WE'VE GOT YOU **COVERED**

SUPERTOUCH[®]

PERSONAL PROTECTIVE EQUIPMENT AND WORKWEAR

ABOUT US

Since our launch in 1996, Supertouch® has become a well-known brand within the UK Protective Workwear and Disposables Industry. We pride ourselves on our great products, competitive pricing and outstanding customer service.

We are able to offer you our quality products at highly competitive prices. We are one of the largest stockholders of hand protection and workwear in the United Kingdom, which helps us to reduce the time it takes for you to receive your order.

We believe in the importance of developing long-lasting Business-to-Business relationships through careful consideration of your needs. As such, we have a dedicated team of Business Development Managers covering the UK - no matter where you're based we have you covered!

Values & Responsibilities

Our mission is to provide an enthusiastic customer-led service in order to further establish our position as one of the leading B2B suppliers of Personal Protective Equipment within the United Kingdom. We have a clear set of values that underpin our working practice to ensure that we provide the best service possible at all times:

Range: We offer one of the largest ranges of hand protection and workwear within the UK to ensure that we offer our customers the most practical solutions to their personal protection and workwear needs.

Value: We take pride in providing high quality products that are excellent value for money.

Service: We believe that business should be straightforward and strive to provide a fast and efficient service.

Sustainability

We are aware of the impact that our operations have on the environment. As a result, we follow the guidelines of **ISO 14001:2015** to ensure that we are a sustainable business.

Achieving sustainability in an industry dominated by disposables is a challenge we aim to tackle head-on. One of the ways that we do this is through the quality of our range, which ultimately last longer than inferior products.

We have undertaken several measures to improve our environmental impact, such as:

- Removing 85% of plastics from protective glove packaging
- Consolidating import loads to reduce carbon footprint
- Auditing suppliers to ensure materials are ethically sourced
- Exploring ways to reduce end-of-life impact of products

Quality Assurance

We pride ourselves on the quality of our products and are dedicated to ensuring their on-going compliance with all necessary British, European and International standards. All products are tested and certified at independently accredited testing facilities, and our experienced Technical team is always on hand to offer advice and support.

Our in-house Quality Assurance team is responsible for the implementation of our audited **ISO 9001 Quality Management** System and as such, performs strict quality audits on all products received by the company to maintain the high standards that our customers have grown to expect.

We are thoroughly committed to investing in the development of both new and existing products in order to remain at the forefront of industry trends. As new materials, processes and products are introduced into the marketplace, our belief in product development enables us to continue to meet and exceed the requirements of our customers.

What We Supply

We supply a wide range of products including:

- EN ISO 20471 & RIS-3279-TOM compliant hi-vis workwear
- Wet weather and outer-wear
- General workwear and corporate workwear
- Protective footwear
- Protective gloves - ranging from leather riggers to anti-cut gloves
- Colour-coded hygienic disposable products
- Fall arrest kits, safety helmets, hearing and respiratory protection
- Safety glasses and goggles

Our Services

In addition to our standard product range, we can also provide bespoke or customised items.

Printing & Embroidery:

Whether you're looking for single-colour printing, or complex embroidered designs, why not take advantage of our printing and embroidery service? Our Sales Team are on-hand to discuss your requirements and offer advice as to the most suitable solutions. We also have access to a dedicated studio to assist with finalising your artwork to ensure the best possible results every time.

Distribution

We understand just how important a rapid delivery service is to our customers. Our Midlands-based Distribution Centre makes delivery quick and efficient no matter where you're based - perfect for such a fast-paced market.

We work with leading logistics companies in order to provide you with reliable and cost-effective delivery solutions, and with a next-day delivery service available*, you can be sure that our goods will be with you when you need them.

FEATURES & SYMBOLS GUIDE

DISPOSABLES FEATURES

	Single Use This symbol indicates that the product is intended for single use only.		Latex Free Items with this symbol are latex free and are suitable for latex allergy sufferers.
	Powder Free Products with this symbol are powder free.		Contains Latex Items with this symbol contain latex and are not suitable for latex allergy sufferers.
	Free From GM Corn Starch Items displaying this symbol are powdered with GM free corn starch.		

CLOTHING STANDARDS

	EN ISO 20471 - Garments carrying this symbol conform to the new International Standard EN ISO 20471.	EN 1150 - EN 1150 relates to high vis garments for non-professional use. The standard tests the visibility of the garment in daylight and when illuminated by vehicle headlights.	
	RIS-3279-TOM - (formerly GO/RT 3279) Items carrying this symbol comply with the Rail Industry Standard RIS-3279-TOM and are suitable for use within the Rail, Underground and Transport industries.		EN 343 - EN 343 relates to garments that are intended to be worn in adverse weather conditions. The standard covers both waterproofness and breathability.
	EN ISO 11612 - Garments displaying EN 11612 are designed to protect the wearer against heat/flame. Tests assess protection against convective heat, flame spread & molten iron splashes.		EN ISO 11611 - EN ISO 11611 applies to garments used during welding & allied processes. Testing assesses the garment's ability to protect against flame and radiant heat.
	IEC 61482-2 - IEC 61482-2 is the standard used to test garments and fabrics which are intended to protect the wearer against arc flashes.		EN 13982-1 (Type 5) - This symbol demonstrates EN 13982-1 compliance meaning that the item offers Type 5 protection against airborne solid particulates.
	EN 1149 - EN 1149 refers to the level of electrostatic protection offered by the item. Testing covers surface resistance, vertical resistance & level of charge decay offered by the item.		EN 13034 (Type 6) - Items displaying this symbol conform to EN 13034, meaning that the garment offers Type 6 Chemical Protection against limited life chemicals.
	EN 1073 - Clothing displaying this symbol conforms to EN 1073, meaning that it protects against radioactive contamination.		EN 13758-2 - This symbol demonstrates that the garment has been tested against EN 13758-2 which indicates solar UV protective properties.
	EN ISO 14116 - The EN ISO 14116 standard specifies safety apparel, materials and material compositions with limited flame spread. Such garments protect the user from short-term, accidental contact with heat or sparks.		EN 14126 - This symbol demonstrates that the garment has been tested against EN 14126 which indicates protection against infective agents.
	EN 14605 (Type 3 & 4) - This standard indicates for clothing with liquid-tight (Type 3) or spray-tight (Type 4) seams.		

GUIDES & CHARTS

FEATURES & SYMBOLS GUIDE

GLOVE STANDARDS

EN 21420 - This standard ensures that gloves are comfortable to wear & safe to use. It covers length, sizing, dexterity, pH value and Chrome VI levels (leather gloves only). All CAT II and CAT III gloves comply with this standard.		BS EN 16523-1:2015 - This standard refers to the determination of material resistance of protective gloves to permeation by potential hazardous liquid chemicals under the condition of continuous contact.	
	EN 388:2016 - This standard refers to gloves that offer protection against mechanical risks. EN 388:2016 covers the abrasion, circular blade, tear, puncture, straight blade and impact resistance of the glove.	EN 12477 - Gloves carrying EN 12477 are suitable for use in manual metal welding, cutting and allied processes. The standard draws on EN 420, EN 388 and EN 407.	
	EN 407 - EN 407 refers to protection against thermal hazards. The testing covers the burning behaviour, heat resistance and molten metal splash resistance of a glove.	EN 455 - EN 455 refers to "Medical Gloves for Single Use". Testing includes freedom from holes, sizing & strength, biological evaluation and shelf life testing.	
	EN 511 - EN 511 denotes that the gloves offer cold protection. The standard tests the convective cold & contact cold insulation properties offered by the glove.		Plastic Materials and Articles in Contact with Food Regulation EU 10/2011 - This symbol denotes that this single use item is suitable for use with food.
	EN ISO 374-1:2016/Type A - This symbol denotes that this glove protects against chemicals and micro-organisms. In this case permeation performance shall have a minimum of 30 minutes breakthrough time against a minimum of 6 test chemicals.	EN ISO 374-4:2013 - This standard refers to the degradation levels that indicate a change in the puncture resistance of gloves after exposure to the challenge chemical.	
	EN ISO 374-1:2016/Type B - This symbol denotes that this glove protects against chemicals and micro-organisms. In this case permeation performance shall have a minimum of 30 minutes breakthrough time against a minimum of 3 test chemicals.	 VIRUS	EN ISO 374-5:2016 - This symbol means that gloves offer protection against bacteria and fungi. Gloves have been tested for penetration (leakage) according to EN ISO 374-5:2016 using the test method in EN 374-2:2014, but do not need to be tested against chemical permeation. The word 'Virus' is to be included under the pictogram to signify protection against bacteria, fungi and viruses, but if the word 'Virus' is not present then only protection against bacteria can be claimed.
	EN ISO 374-1:2016/Type C - This symbol denotes that this glove protects against chemicals and micro-organisms. In this case permeation performance shall have a minimum of 10 minutes breakthrough time against a minimum of 1 test chemical.		
	User Information - This symbol indicates that user information comes with this product.		

PPE STANDARDS

EN 149 - Respiratory devices tested against EN 149 are defined as filtering half masks offering protection against airborne particles.	EN 362 - EN 362 details a variety of tensile and corrosion resistance tests to ensure that connectors are suitable for use as part of a fall arrest system.
EN 405 - This standard applies to valved filtering half-masks offering protection against gases, or gases and particles.	EN 355 - This standard assesses suitability of shock absorbing lanyards intended for use within a fall arrest system.
EN 140 - This standard defines the requirements for half and quarter masks intended for use as part of a respiratory protective device.	EN 397 - This standard is used to test the impact/shock absorption, penetration resistance and overall design suitability of industrial safety helmets.
EN 14387 - EN 14387 details the minimum requirements for gas filters or combined filters intended for use within a respiratory protective device.	EN 50365 - EN 50365 is used to assess the electrical resistance offered by insulating safety helmets intended for use on low voltage installations.
EN 143 - This standard details the requirements for particle filters intended for use within a respiratory protective device.	EN 166 - This standard details minimum requirements for eye protection intended for use with typical hazards found in industry, laboratories etc.

GUIDES & CHARTS

FEATURES & SYMBOLS GUIDE

PPE STANDARDS

EN 352 - EN 352 defines the requirements and testing for hearing protective products. EN 352-1 covers earmuffs, whilst EN 352-2 covers earplugs.

EN 170 - EN 170 specifies the requirements for ultraviolet filters used within personal eye-protectors for industrial use.

EN 361 - This standard defines the minimum requirements for full body harnesses intended to hold the user in place in the event of an arrested fall.

EN 172 - This standard specifies the requirements for sun glare filters used in personal eye-protectors for industrial use

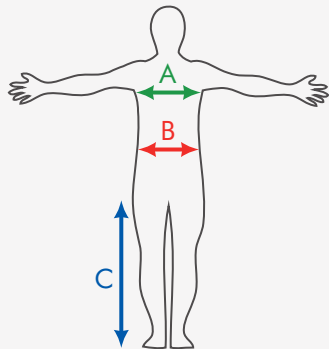

EN 354 - EN 354 assesses the tensile strength of lanyards used as part of a fall arrest system.

PAWĀ® FEATURES

	Breathable This symbol indicates that this glove is breathable - offering great moisture control.		ULTRA Breathable This symbol indicates that this glove offers superior breathability - offering excellent moisture control.
	High Dexterity This symbol indicates that this glove offers dexterity - ideal for parts handling, assembly and fabrication.		Coolmax® Technology This symbol indicates that this glove utilises Coolmax® technology within it's lining to keep hands cool and dry.
	Anti-Fatigue This symbol indicates that this glove features functional knitted technology within its design that reduces hand fatigue.		Water Repellent This symbol indicates that the glove features a water-repellent coating.
	Touchscreen Capable This symbol indicates that touchscreen devices can still be used whilst wearing these gloves.		Oil Resistant This symbol indicates that the glove features an oil-resistant coating.
	Excellent Grip This symbol indicates that the coating of the glove offers grip even in the most challenging of conditions.		Sharp Handling This symbol indicates that this glove is an ideal choice for any sharp handling.
	Cold Protection This symbol indicates that this glove has properties which make it resistant to cold temperatures.		Anti-Cut This symbol indicates that the glove is resistant to cuts from sharps or mechanical hazards.
	Thermolite® Technology This symbol indicates that this glove utilises Thermolite® technology within it's lining to provide superior warmth in cold conditions.		Contact Heat Resistant This symbol indicates that this glove offers contact heat resistance.
	DuPont® Kevlar® Fibre This symbol indicates that the glove contains DuPont® Kevlar® fibre within its lining.		Heavy Duty This symbol indicates that this glove is robust - an ideal choice for challenging tasks.
	Thumb Crotch This symbol indicates that the glove features a reinforced thumb crotch.		PawāLife™ Grip Coating This symbol refers to a dotted palm coating that provides the Pawā® PG111 glove with additional durability and grip.
	Flame Resistant This symbol indicates that the glove has flame resistant properties.		Molten Metal Small Splash Resistant This symbol indicates that the glove has some resistance against small splashes of molten metal.

These recommendations are made on the basis of guidelines in respiratory protection and reflect the present legislation and knowledge. This information should only be used as a guide, it remains the responsibility of the user to identify all contaminants and contaminant levels to ensure that the correct protection is selected and worn at all times.

MOLDEX FIT TESTING KIT

There are two main reasons for doing Bitrex testing. Firstly to make sure that the respirator itself is suited for the wearers particular face shape. Secondly to make sure that the respirator is fitted correctly to get a tight seal and ensure safety against hazards in the workplace.

- 2 x nebulisers
- 1 x test hood
- 6 x 2.5ml ampoules Bitrex™ Sensitivity solution
- 6 x 2.5ml ampoules Bitrex™ Test solution
- 2 x spare parts for nebulisers
- 1 x Moldex Qualitative Fit Test CD
- Supplied in a sturdy carry case

JSP® FORCE™ 8 HALF FACE MASK

The Force™ 8 Half Mask Respirator features a twin cartridge design that - when combined with JSP®'s PressToCheck™ filters - provides protection against a variety of gases, vapours and airborne particulates. Additionally, the Force™ 8 respirator offers low breathing resistance.

- Conforms to EN 140:1998
- Compatible with PressToCheck™ filters (not included)
- Fully adjustable 4-point cradle suspension ensuring an effective facial fit
- Durable thermoplastic rubber mask offers a snug fit for the majority of face shapes
- CR2™ reflective strips increase visibility in low-light environments for additional safety
- Low resistance Typhoon™ exhalation valve for easy breathing

Packaging:	10 pieces per case		
Code	Size	Description	Colour
JSPBHG003-1L5-000	S	Force™ 8 Half Face Mask

JSP® FORCE™ 10 FULL FACE MASK

The JSP® Force™ 10 is an extremely lightweight, easy to maintain full face mask with panoramic visor for a superior fit. When used with JSP®'s PressToCheck™ filters, the Force™ 10 offers excellent protection against gases, vapours and airborne particulates.

- Ergonomic design provides an excellent face seal - maximising wearer compatibility
- Visor protector included (to be removed before use)
- Compatible with PressToCheck™ filters (not included)
- Typhoon™ exhalation valve reduces breathing resistance and heat and moisture build-up
- Engineered for easy maintenance
- Lightweight and comfortable - perfect for all day use
- Moisture resistant valve can be used with the same performance at very low temperatures

Packaging:	Single pieces
