

### Disinfectant Twin Track Traffic Mats

- FL-04-402: Disinfectant Twin Track Traffic Mats: 'Tractor Mats'
  - o (600cm x 100cm) – Pack/2
- FL-04-401: Disinfectant Twin Track Traffic Mats: Heavy Goods Vehicle:
  - o (350cm x 100cm) - Pack/2

Our hardwearing and effective Tractor Mats are an excellent method for helping to reduce the spread of diseases around farms, animal feed factories, food processing companies and theme and leisure parks.

They were used extensively in the Foot and Mouth Outbreak of 2001 and were proven to reduce bacterial counts. The mats can hold dispense disinfectant into tyre treads as they pass over, not wasting any disinfectant which can be easily replenished as necessary.

The Tractor Mats are 6 metres long to ensure it accommodates the whole circumference of the tractor tyre. They are constructed of superabsorbent matting with a hardwearing cover encased in a PVC coated polyester envelope and can be laid on concrete and attached with the fixings provided.

### **Applications**

- Food manufacturing & distribution plants
- Horticulture units
- Agricultural events/open days
